# Software Engineer 1

00124499

## Locations:

Mountain View, California

## Description

Come join the Quick Books Online team as a Software Engineer 1. In this role you will develop the functionality that will extend our core Quick Books Online experience for Accountants. You will be developing a Single Page Application using the latest JavaScript, CSS, and HTML technologies.

This position requires of strong software engineering skills. If you love having real world challenges and making customers happy while fostering your desire to write perfect code and user experience, this is the job for you. Along with coding, you will be responsible for working with product managers, backend developers and designers on our agile team structure. We love product engineers who lead the charge, communicating with customers and delivering the most beautiful, intuitive application possible is a must.

## Responsibilities:

- Successful delivery of high quality web or mobile software (requirements, design, code, documentation, etc.)
- Roughly 80-95% hands-on coding
- Contribute to early quality activities, including peer reviews of estimates, designs and code
- Resolve defects/bugs during QA testing, pre-production, production, and post-release patches
- Partner effectively with all team members to deliver against commitments
- Work cross-functionally with various Intuit teams: product management, QA/QE, various product lines, or business units to drive forward results
- Commitment to team success and positive team dynamics
- Passion for growing and applying technical skills in service to customers

- Experience with Agile Development, SCRUM, and/or Extreme Programming methodologies
