Morphing a Sphere into a Circle

A possible vis application??

Original texture map

Original texture map

Mapped onto a Sphere

Morphed into a Circle
Morphing a Cow into a Sphere

```
vec4 vertex = gl_Vertex;
vertex.xyz *= 4. / length(vertex.xyz);
```

Note: the “face” in the sphere cow is there because the normals were not morphed into sphere normals – they were left as cow normals

Morphing a Cow into a Cube

```
const float SIDE = 2.;
vec4 vertex = gl_Vertex;
vertex.xyz *= 4. / length(vertex.xyz);
vertex.xyz = clamp(vertex.xyz, -SIDE, SIDE);
```

Note: the “face” in the cube cow is there because the normals were not morphed into cube normals – they were left as cow normals

What about “Real Morphing”?

“Real Morphing” involves interpolating vertices from one object into vertices in another. This flies in the face of graphics hardware’s philosophy of dealing with one triangle and then getting rid of any record of it. We got away with it here because we knew the equation of a disk, a sphere, and a cube;

The first morphing I can remember is from the fantasy movie Willow

There is also some great morphing in Michael Jackson’s Black or White video: https://www.youtube.com/watch?v=F2AdTPISUJ0

The morphing starts at around 5:30
