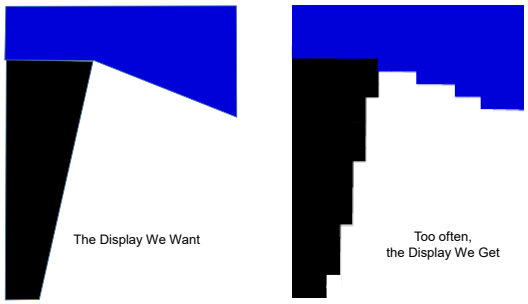
2

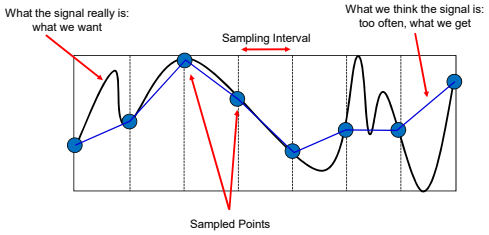
Aliasing



3

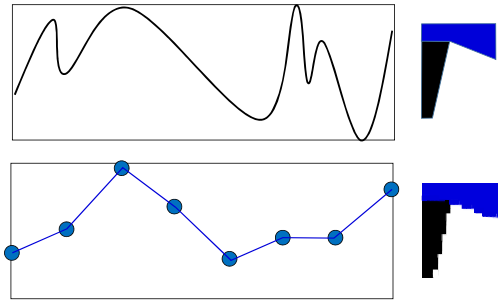
Aliasing

"Aliasing" is a signal-processing term for "under-sampled compared with the frequencies in the signal".



4

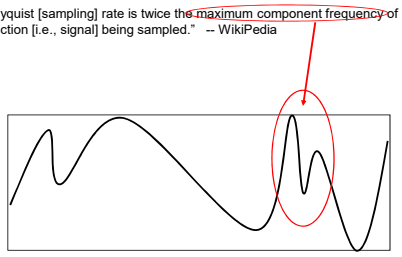
Aliasing



5

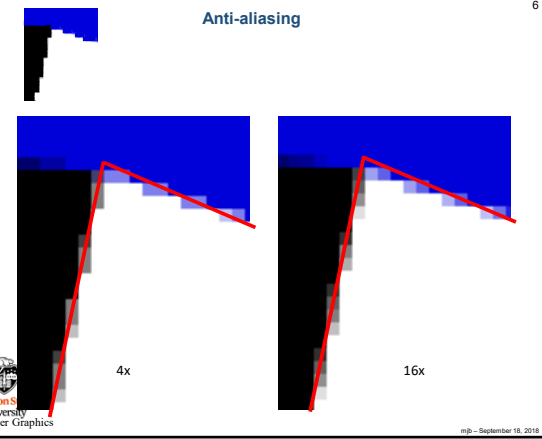
Nyquist Criterion

"The Nyquist [sampling] rate is twice the maximum component frequency of the function [i.e., signal] being sampled." -- WikiPedia



6

Anti-aliasing



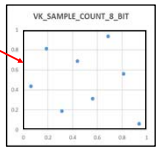
MultiSampling

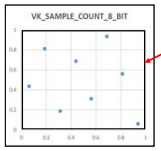
7

Multisampling is a computer graphics technique to improve the quality of your output image by looking inside every pixel to see what the rendering is doing there. There are two approaches:

1. **Supersampling**: Pick some number of unique sub-pixels within a pixel, render the image at each of these individual sub-pixels (including depth and stencil tests), then average them together. This results in lots of renders.

One entire pixel





One entire pixel

2. **Multisampling**: Perform a single color render for the one entire pixel. Then, pick some number of unique sub-pixels within that pixel and perform depth and stencil tests there. Assign the single color to all the sub-pixels that made it through the depth and stencil tests

Note: per-sample depth and stencil tests are performed first to decide which color renders actually should be done

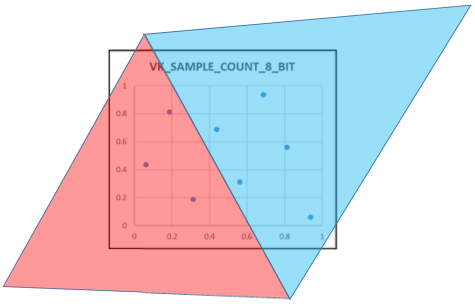
Consider Two Triangles Whose Edges Pass Through the Same Pixel

10

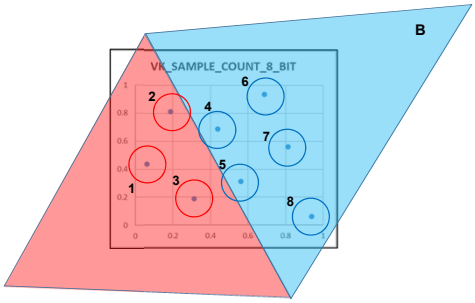


Oregon State University Computer Graphics

mjb – September 18, 2018

Supersampling

11



$$Final\ Pixel\ Color = \frac{\sum_{i=1}^{8} Color\ sample\ from\ subpixel_i}{8}$$

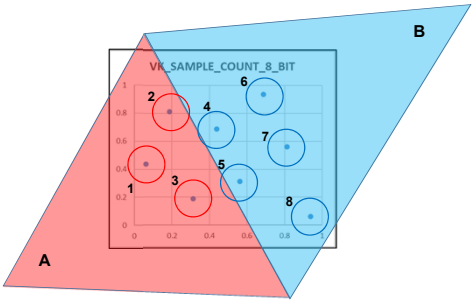
Fragment Shader calls = 8

Oregon State University Computer Graphics

mjb – September 18, 2018

Multisampling

12



$$Final\ Pixel\ Color = \frac{3 * One\ color\ sample\ from\ A\ +\ 5 * One\ color\ sample\ from\ B}{8}$$

Fragment Shader calls = 2

Oregon State University Computer Graphics

mjb – September 18, 2018

Setting up the Image

13

```
VkPipelineMultisampleStateCreateInfo        vpmsci;
        vpmsci.sType = VK_STRUCTURE_TYPE_PIPELINE_MULTISAMPLE_STATE_CREATE_INFO;
        vpmsci.pNext = nullptr;
        vpmsci.flags = 0;
        vpmsci.rasterizationSamples = VK_SAMPLE_COUNT_8_BIT;
        vpmsci.sampleShadingEnable = VK_TRUE;
        vpmsci.minSampleShading = 0.5f;
        vpmsci.pSampleMask = (VkSampleMask *)nullptr;
        vpmsci.alphaToCoverageEnable = VK_FALSE;
        vpmsci.alphaToOneEnable = VK_FALSE;

VkGraphicsPipelineCreateInfo        vgpci;
        vgpci.sType = VK_STRUCTURE_TYPE_GRAPHICS_PIPELINE_CREATE_INFO;
        vgpci.pNext = nullptr;
    . . .
        vgpci.pMultisampleState = &vpmsci;

result = vkCreateGraphicsPipelines( LogicalDevice, VK_NULL_HANDLE, 1, IN &vgpci,\
                        PALLOCATOR, OUT pGraphicsPipeline );
```

How dense is the sampling

VK_TRUE means to allow some sort of multisampling to take place

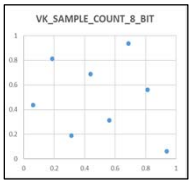
Oregon State University Computer Graphics

mjb – September 18, 2018

Setting up the Image

14

```
VkPipelineMultisampleStateCreateInfo        vpmsci;
    . . .
    vpmsci.minSampleShading = 0.5;
    . . .
```



At least this fraction of samples will get their own fragment shader calls (as long as they pass the depth and stencil tests).

0. produces simple multisampling

(0.,1.) produces partial supersampling

1. Produces complete supersampling
