15. In the circuit below, R1 is connected to another circuit element, and has voltage and current as shown:

\[
\begin{align*}
I &= 1\text{mA} \\
\text{R1} &
\end{align*}
\]

\[+\]

\[-\]

\[5\text{V}\]

a. From the information given, circuit element X is:
   1. A voltage source
   2. A current source
   3. Can't tell

b. The size of resistor R1 is __________.

c. The power dissipated in R1 is __________.
