

Lecture Series on Geologic Carbon Sequestration

Fall 2008

Thursdays 3 PM in Owen 106, Oregon State University

All who are interested are encouraged to attend!

October 2

Geological Storage as a Carbon Mitigation Option

Michael Celia , Princeton University

October 9

CO2 Sequestration within Basalt Formations: The Big Sky Pilot Borehole Program

Frank Spane , Pacific Northwest National Lab

October 30

Carbon Sequestration in Deep-Sea Basalt

David Goldberg , Lamont-Doherty Earth Observatory, Columbia
University

November 6

Numerical Modeling of Coupled Processes in Geologic Storage of Greenhouse Gases - Recent Results and Open Challenges

Karsten Pruess, Lawrence Berkeley National Laboratory

November 13

Microbially Enhanced Geologic Carbon Sequestration

Robin Gerlach

Montana State University / Center for Biofilm Engineering
