

Mac/Linux Instructions

Setting Up Terminal

You have a terminal with ssh built into the OS. Open the terminal, and at the prompt, type

```
ssh username@access.engr.oregonstate.edu
```

You need to complete both sets of instructions (shown below). After completing the configuration, you will be able to create files on the OSU servers and then download them to your local computer.

- **Set up the VPN**

You must **follow the setup instructions** from OSU:

<https://oregonstate.teamdynamix.com/TDClient/KB/ArticleDet?ID=51158>

- **Accessing Engineering File Space:**
