

CS 480

Translators (Compilers)

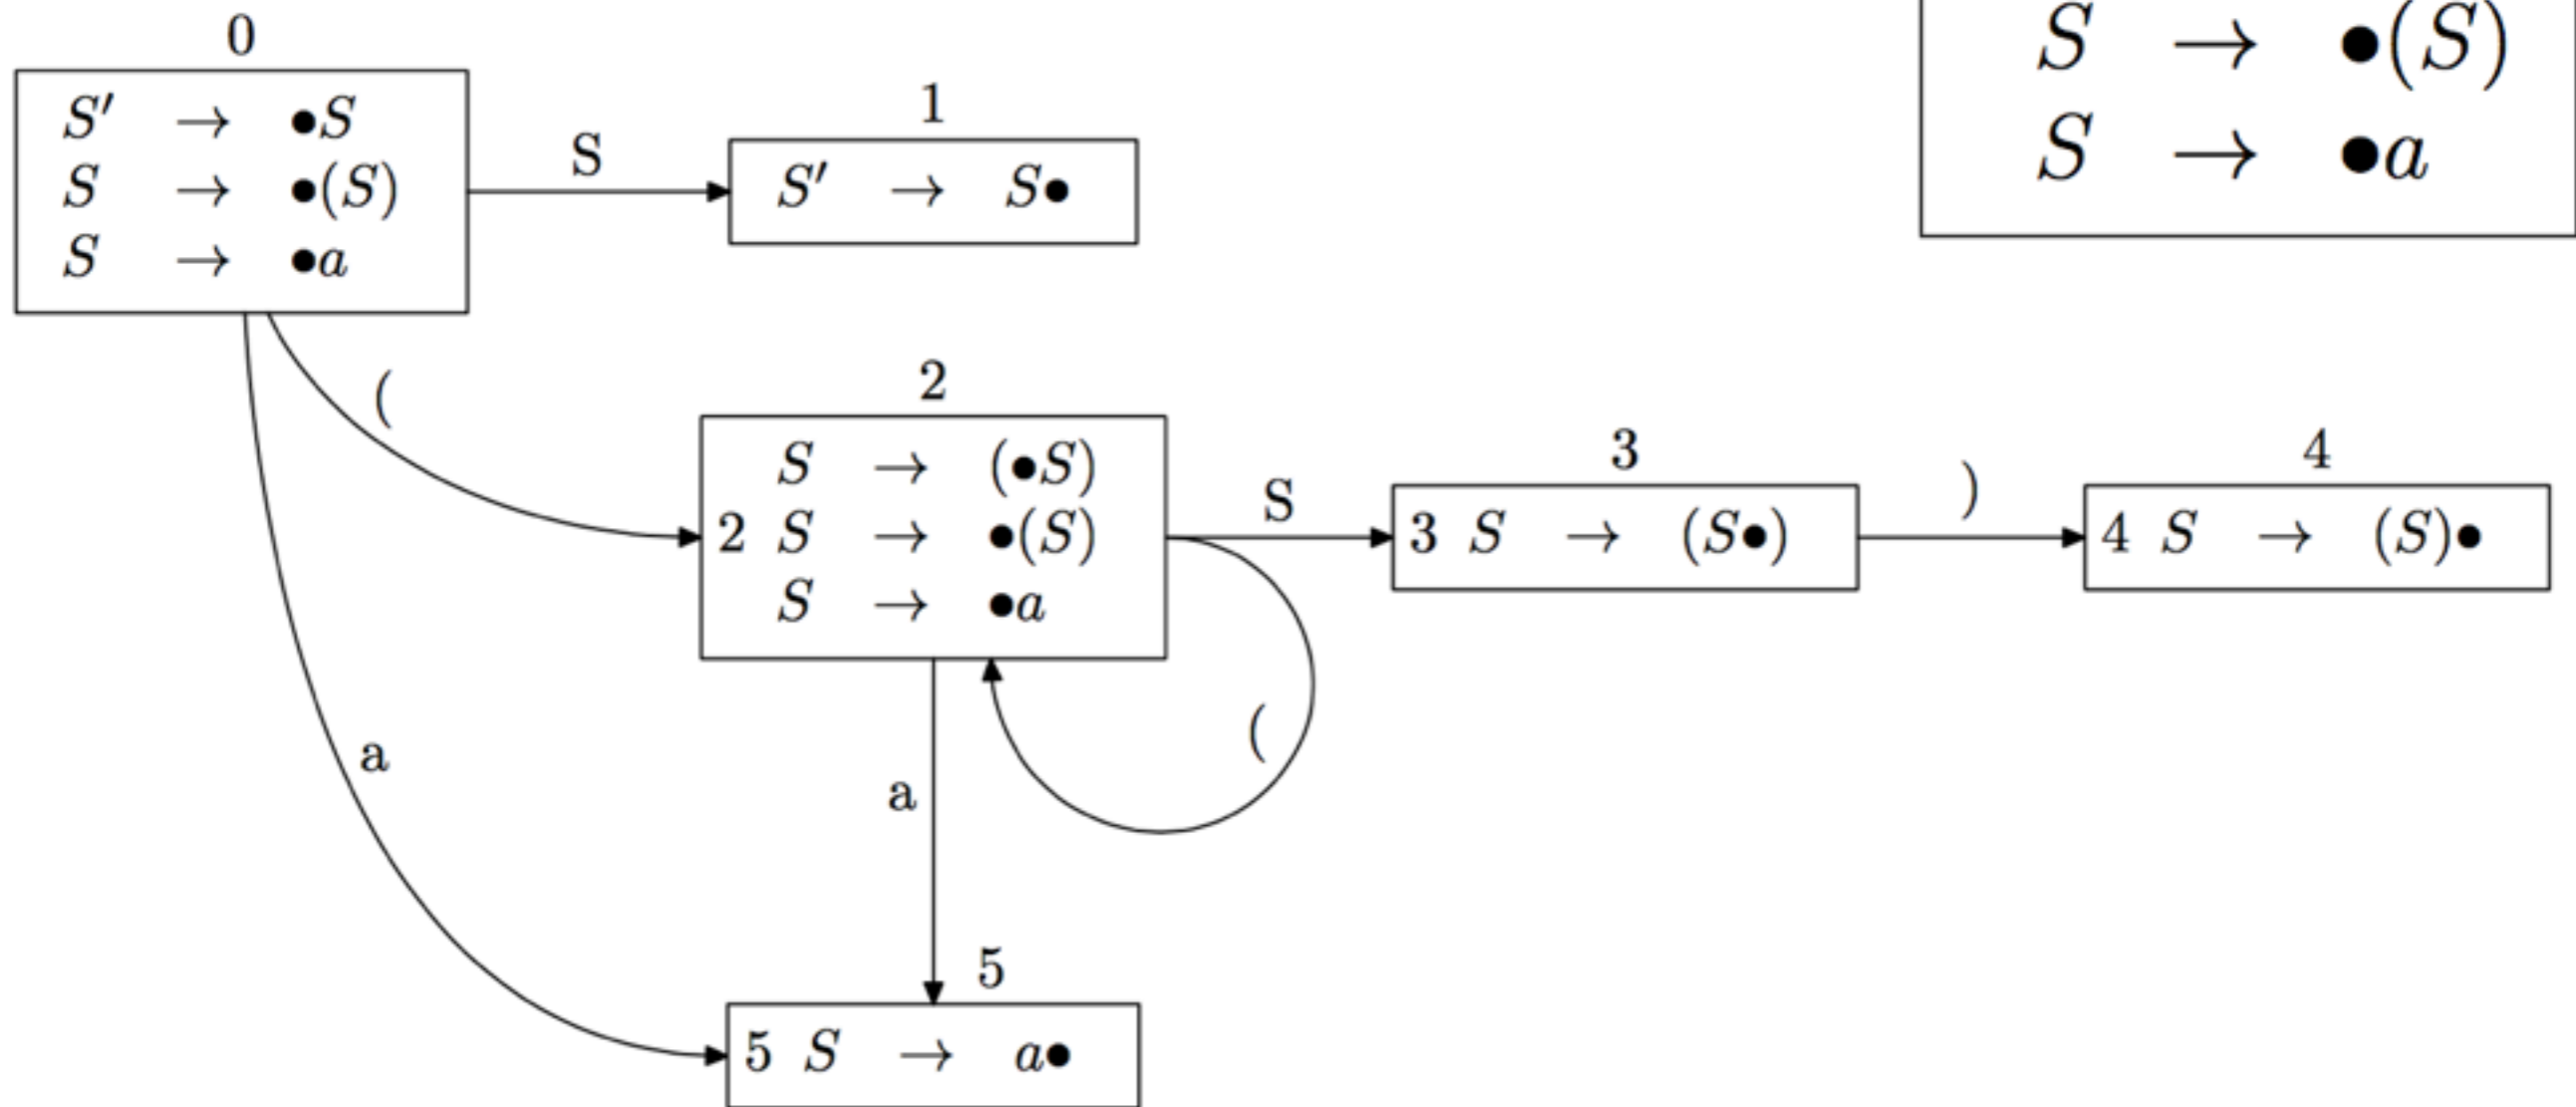

extra slides on LR(0), SLR(1), and LR(1) parsing

Instructor: Liang Huang

(materials extracted from David L. Hill's notes from Stanford CS 143)

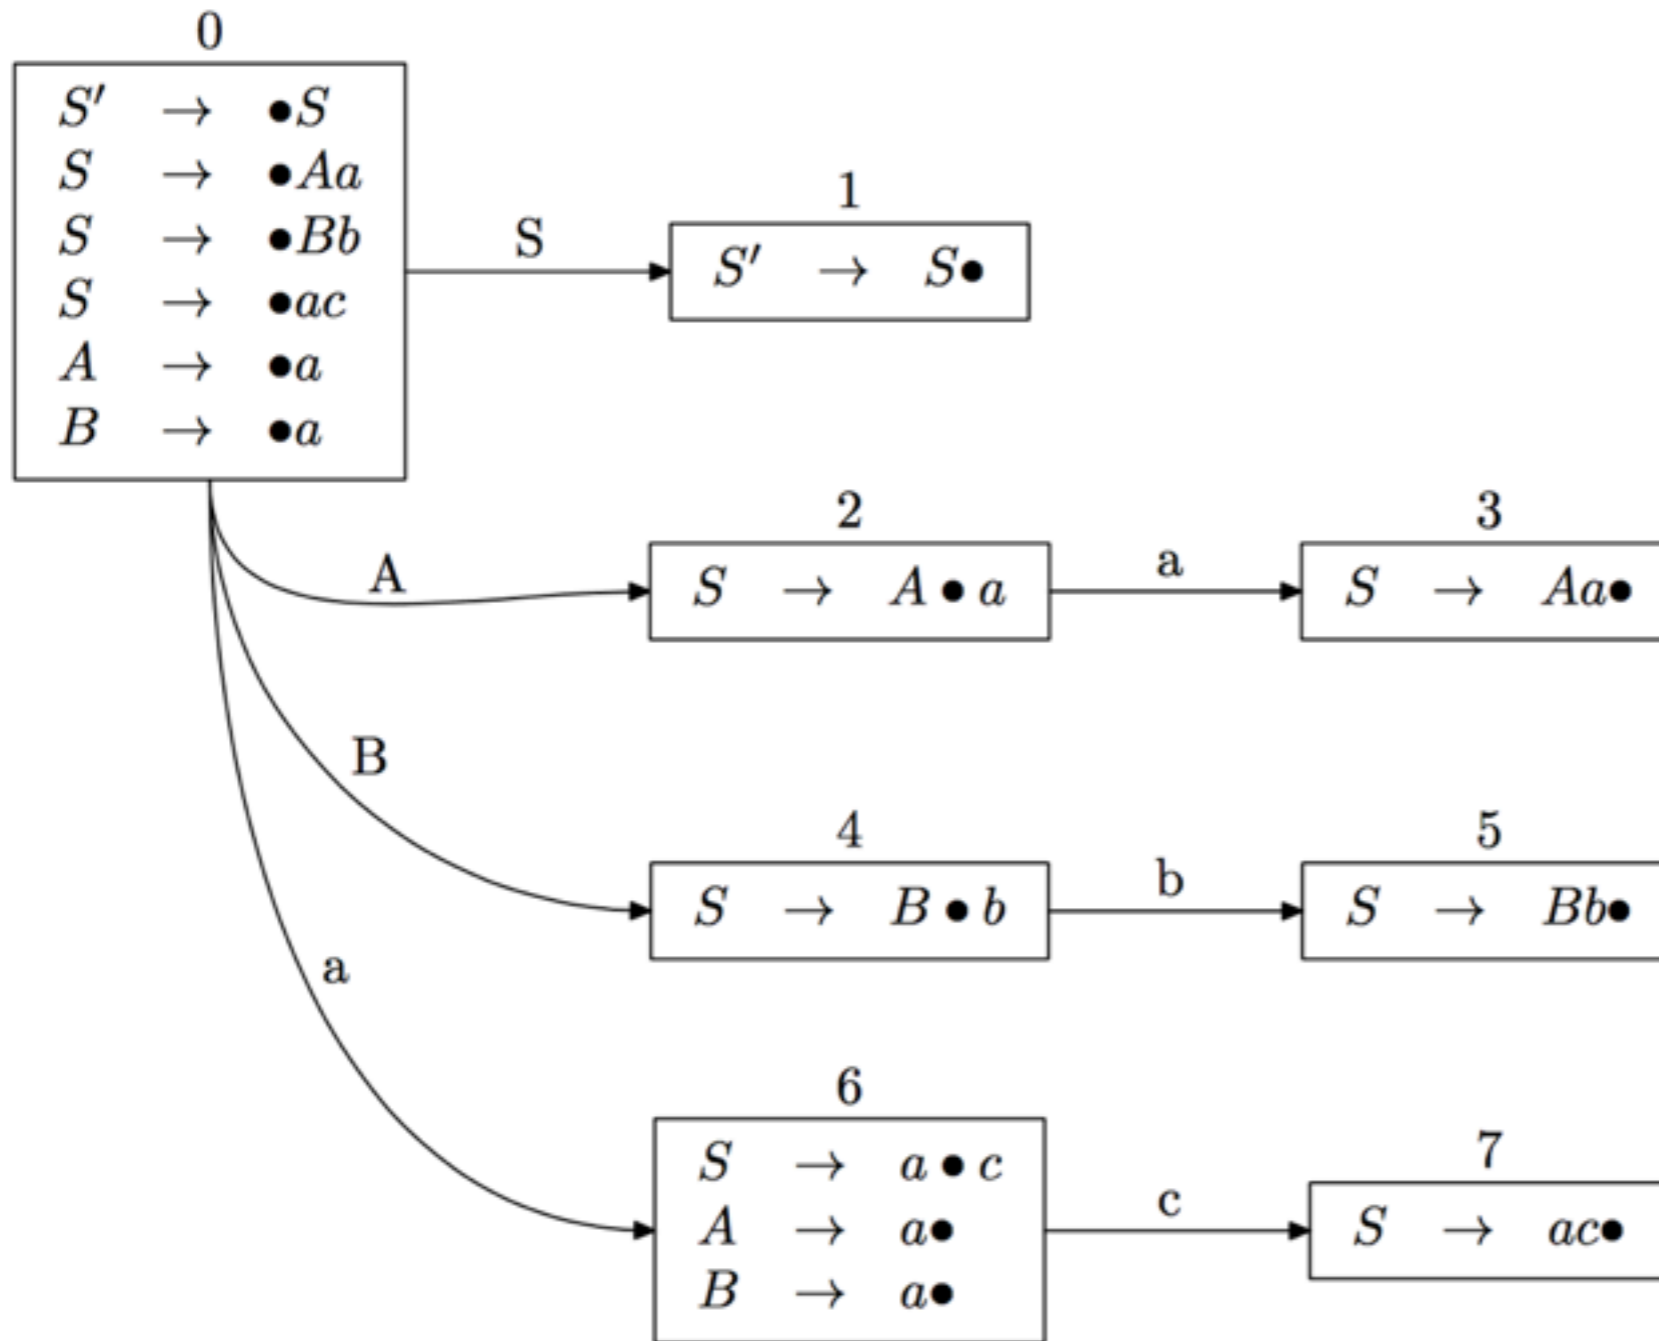

LR(0) Parsing (no lookahead)

- very few grammars are in LR(0)

LR(0) Fails on...

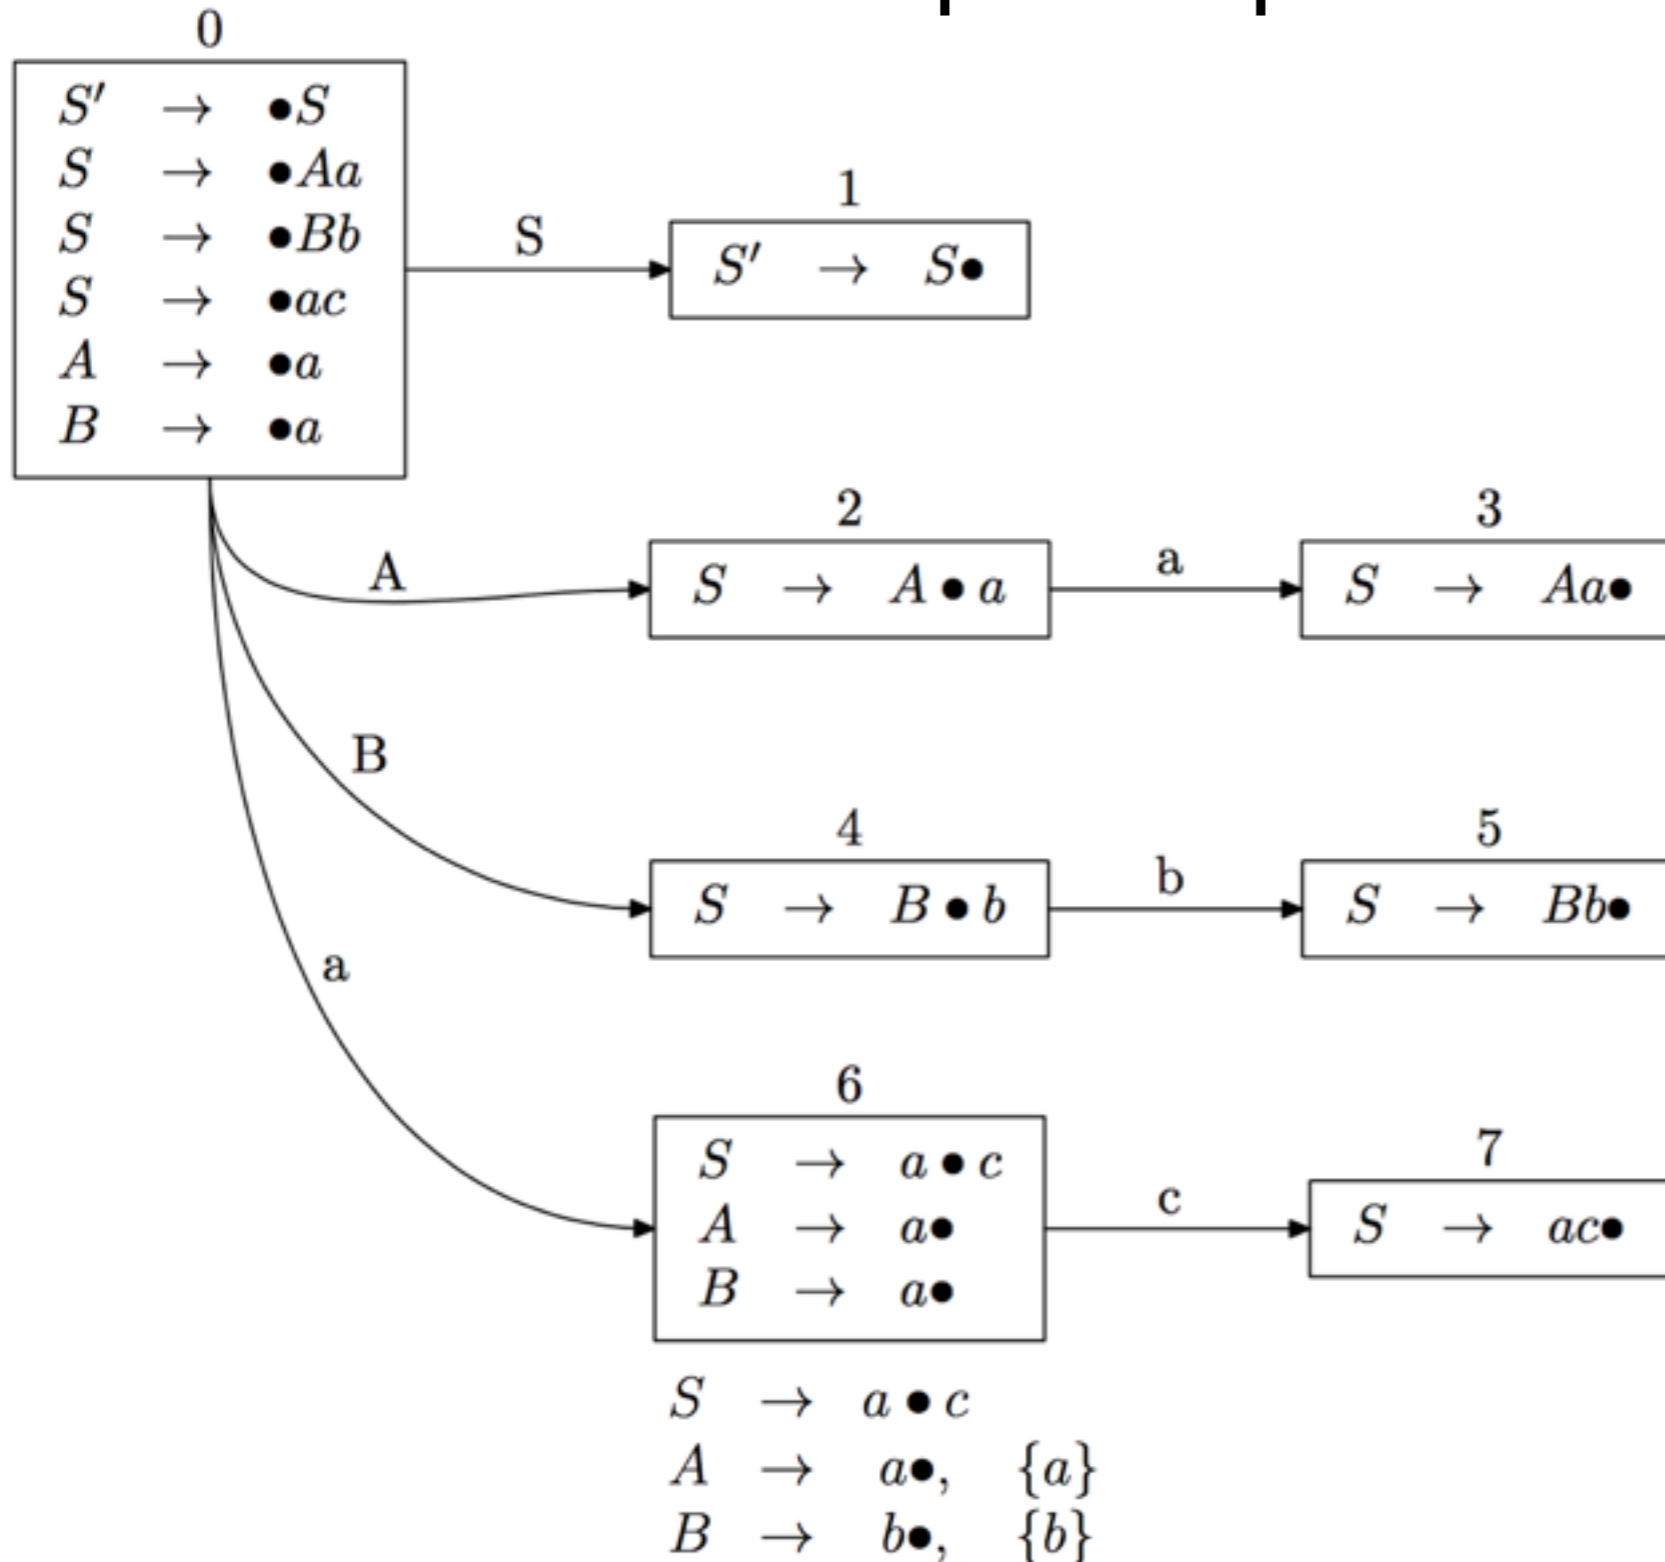

- a state has both shift and reduce or two reduces

0	S'	\rightarrow	S
1	S	\rightarrow	Aa
2	S	\rightarrow	Bb
3	S	\rightarrow	ac
4	A	\rightarrow	a
5	B	\rightarrow	a

SLR(1) -- use FOLLOW sets

- FOLLOW sets are precomputed

0 $S' \rightarrow S$
 1 $S \rightarrow Aa$
 2 $S \rightarrow Bb$
 3 $S \rightarrow ac$
 4 $A \rightarrow a$
 5 $B \rightarrow a$

	ACTION				GOTO		
	a	b	c	\$	S	A	B
0	s6				1	2	4
1				acc			
2	s3						
3				r1			
4		s5					
5				r2			
6	r4	r5	s7				
7				r3			

SLR(I) Fails on...

- unnecessary conflicts

$$\begin{array}{l} S' \rightarrow \bullet S \\ S \rightarrow \bullet Aa \\ S \rightarrow \bullet Bb \\ S \rightarrow \bullet bAb \\ A \rightarrow \bullet a \\ B \rightarrow \bullet a \end{array}$$

$$\begin{array}{l} A \rightarrow a\bullet \\ B \rightarrow a\bullet \end{array}$$

$$\begin{array}{l} S \rightarrow Aa \\ S \rightarrow Bb \\ S \rightarrow bAb \\ A \rightarrow a \\ B \rightarrow a \end{array}$$

LR(I)
