15:05:30 From Allan Duan to Everyone:

A clarification that the timer won't stop, but you can still continue if you leave the tab and there is still time

15:28:03 From Derman, Melek to Everyone:

Since I will be attending two separate conferences over the next two weeks, I have submitted Project 3 early. If I notice that I have made any mistakes or forgotten anything, would it be possible to resubmit it before it's due?

15:28:40 From Allan Duan to Everyone:

Canvas allows for unlimited resubmits

15:28:43 From Van To to Bailey, Mike (direct message):

Coud you please take a look the data print out, and graphs?

15:29:11 From Lora Edens to Everyone:

The sample code is in C++ (looks like) — would you say converting to C would be a wrong move, continue in C++ even if we're not familiar with it?

15:29:19 From Shinji Nobuhara to Everyone:

Do we check max speedup or parallel fraction for the assignment?

15:30:56 From Derman, Melek to Everyone:

I see, thank you very much

15:32:11 From Van To to Bailey, Mike (direct message):

project3.docx

15:32:25 From Van To to Bailey, Mike (direct message):

proj3.csv

15:33:33 From Van To to Bailey, Mike (direct message):

proj3.xlsx

15:37:50 From Van To to Bailey, Mike (direct message):

proj3.xlsx

15:38:25 From Van To to Bailey, Mike (direct message):

I just sent you all the file, with graph and raw data too. Thank you

15:43:26 From Whitney, Travis B to Everyone:

Why do we have to explicitly code it in assembly? Why can't openMP see that and make the same code or why doesn't the compiler do that by default?

15:45:09 From Whitney, Travis B to Everyone:

I guess my follow up question is, why can't openMP do as good of a job as your code?

15:45:15 From Gaikwad, Sahil Sandesh to Everyone:

This seems like a foolish question, but the previously mentioned thing where you're making 4 toasters, so it's only possible in Assembly?

16:21:34 From Shinji Nobuhara to Everyone:

Replying to "Can you show us the execution results of the proje...":
Thank you for sharing the results.

16:32:43 From Cheng, Colin to Bailey, Mike (direct message):

Will the recording upload in this evening, I'm sorry that I missed the part of talking about project #4
