## What is Kaltura?

**Kaltura** is a web-based screen-recording application. OSU owns a site license to it, which means that all students and staff can use it at no cost to themselves. We will use it so that you can show off your great project without you and us having to be sitting together.

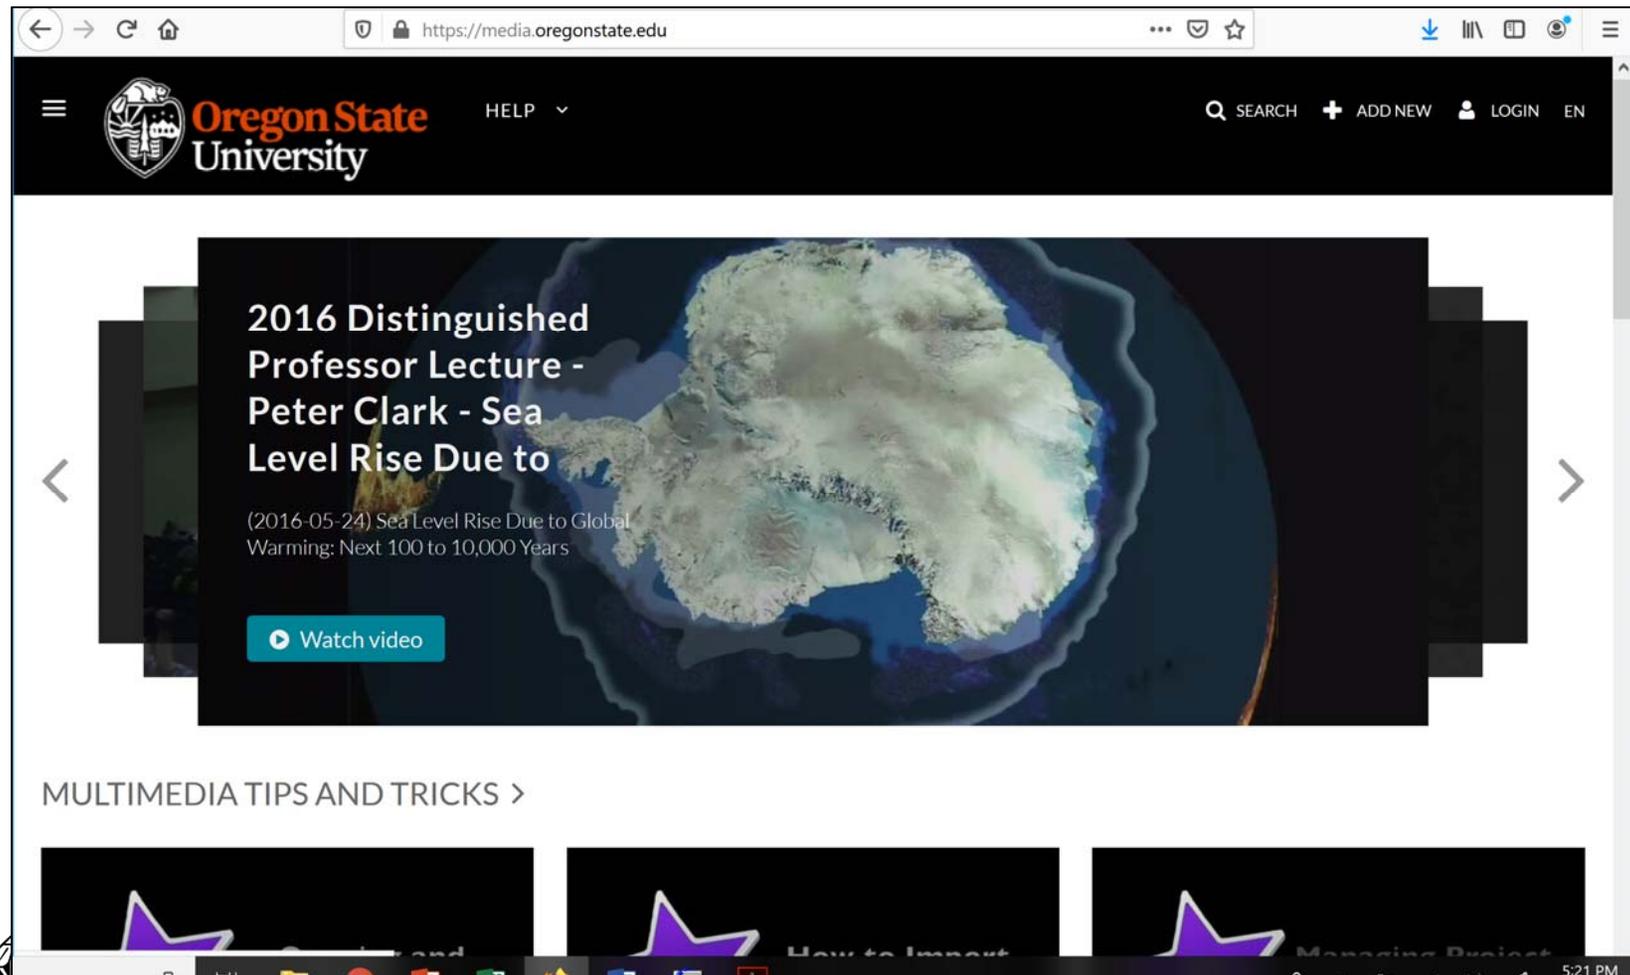

You don't need to use this video as a way to explain your report. I will read the report to get that information. Likewise, don't use the video to walk me through the code. Use this video as a way to show what it looks like when it runs. If I want to see your code, I will go look at it separately. Show off all the required features. Show off anything you have done that is extra and cool. Cool is always good!

If you have a microphone, use it! It is easier for us to figure out what your features do if you are telling us.

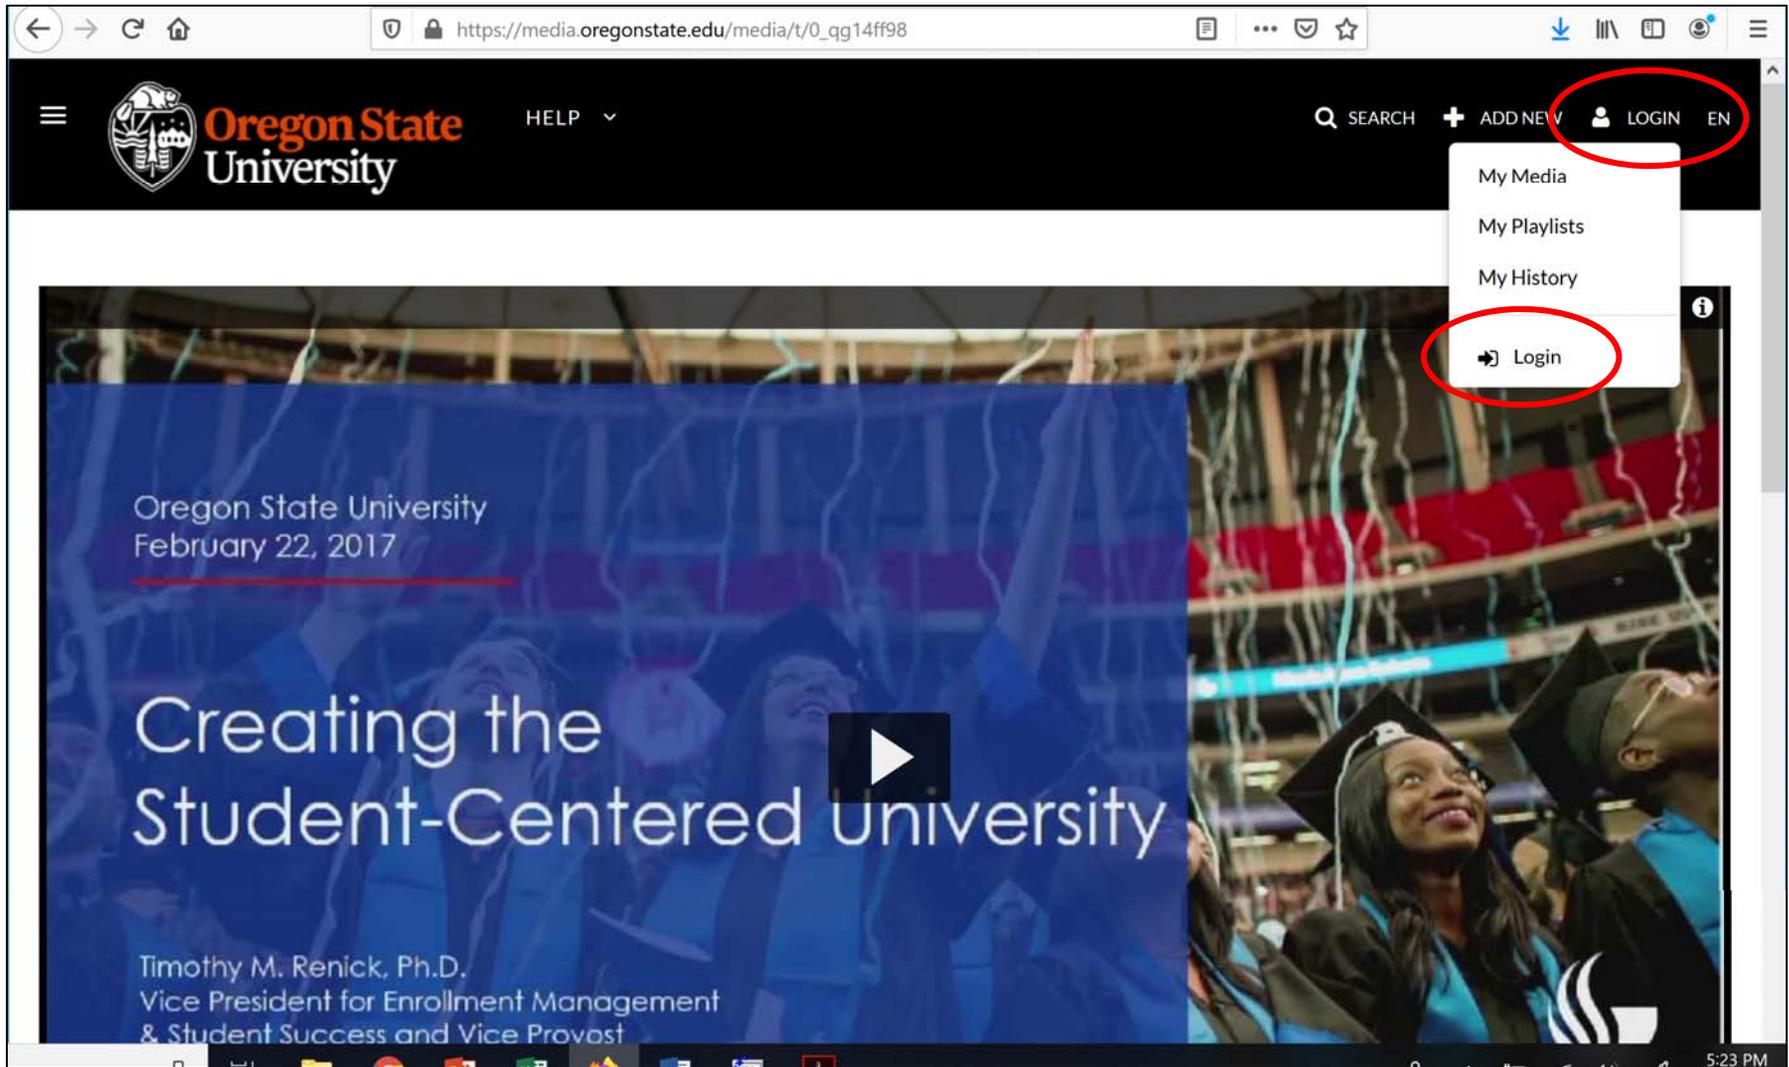

To finish grading each project, we will need to watch a lot of videos. Have mercy on us and keep your video short and to the point. Show us all your different program features, but once you have demonstrated a feature, move on to the next one. Do the math – ***M*** minutes per video times ***P*** people in the class, gives ...

Go to:

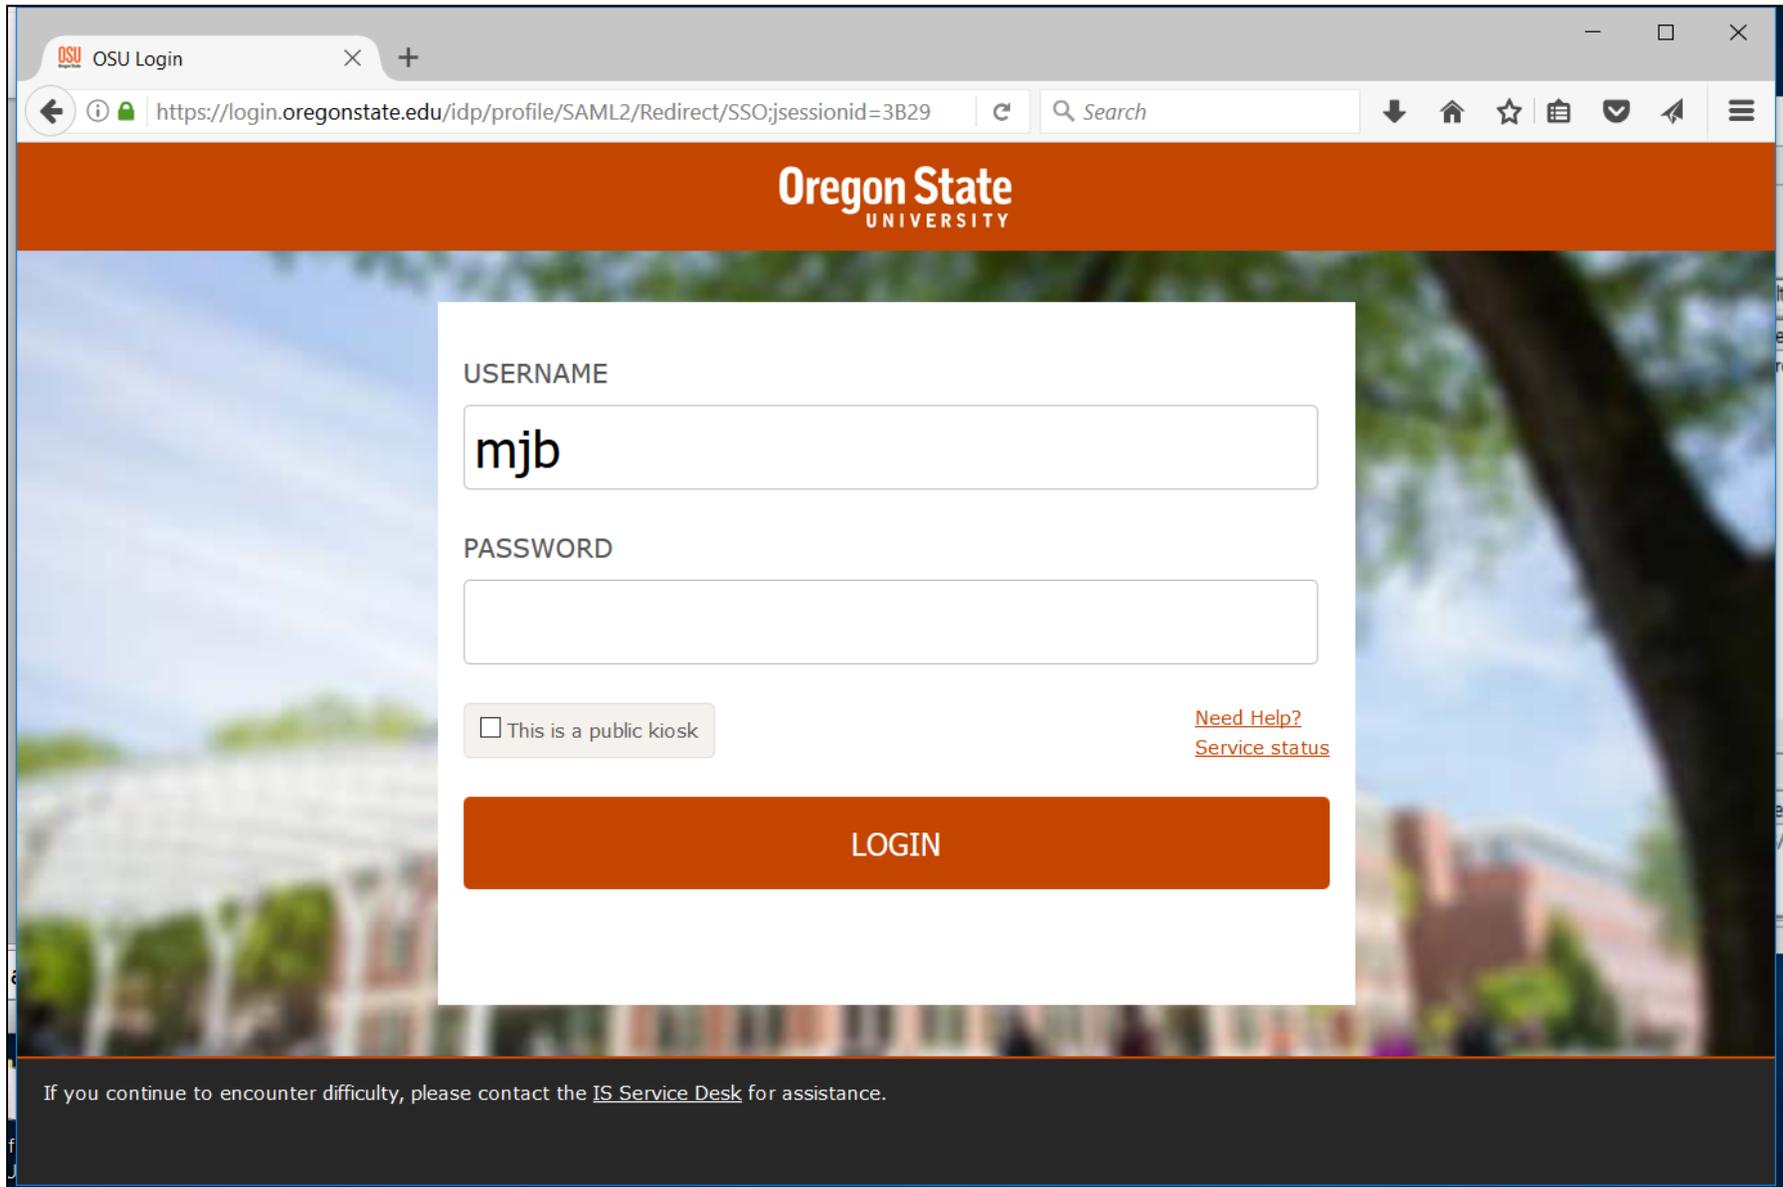

<http://media.oregonstate.edu>

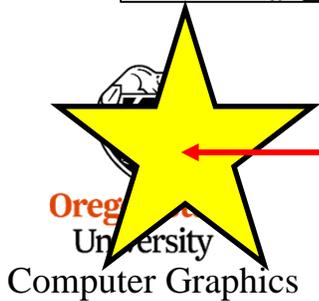

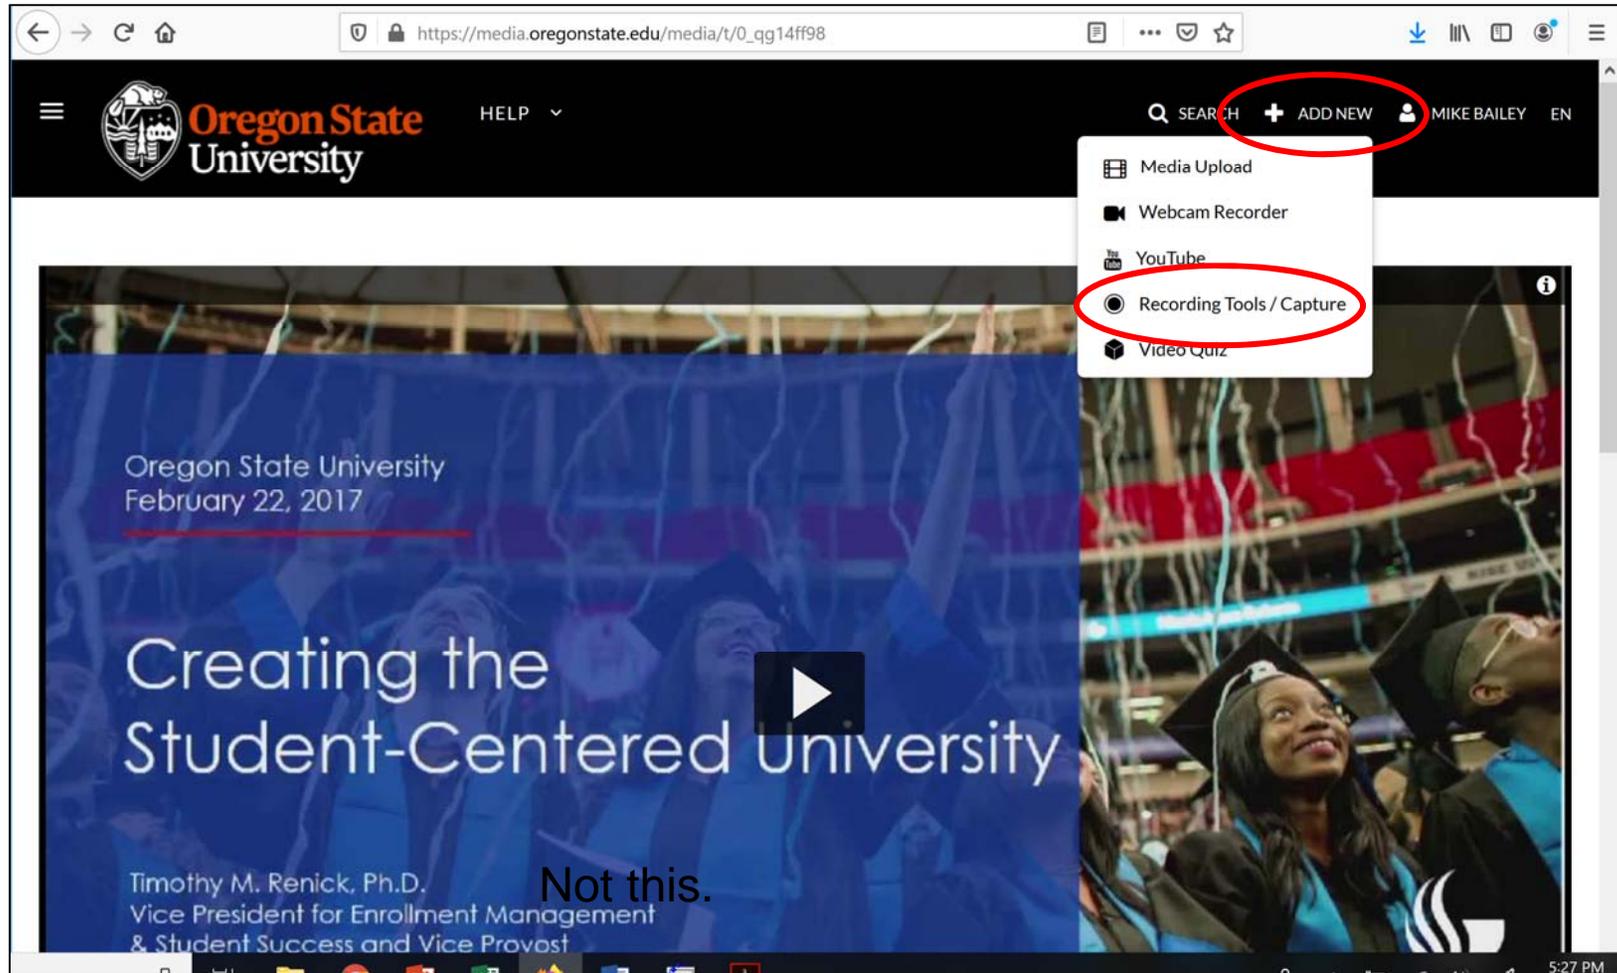

# Login:

# Login with your ONID account and password, and possibly the DUO authentication

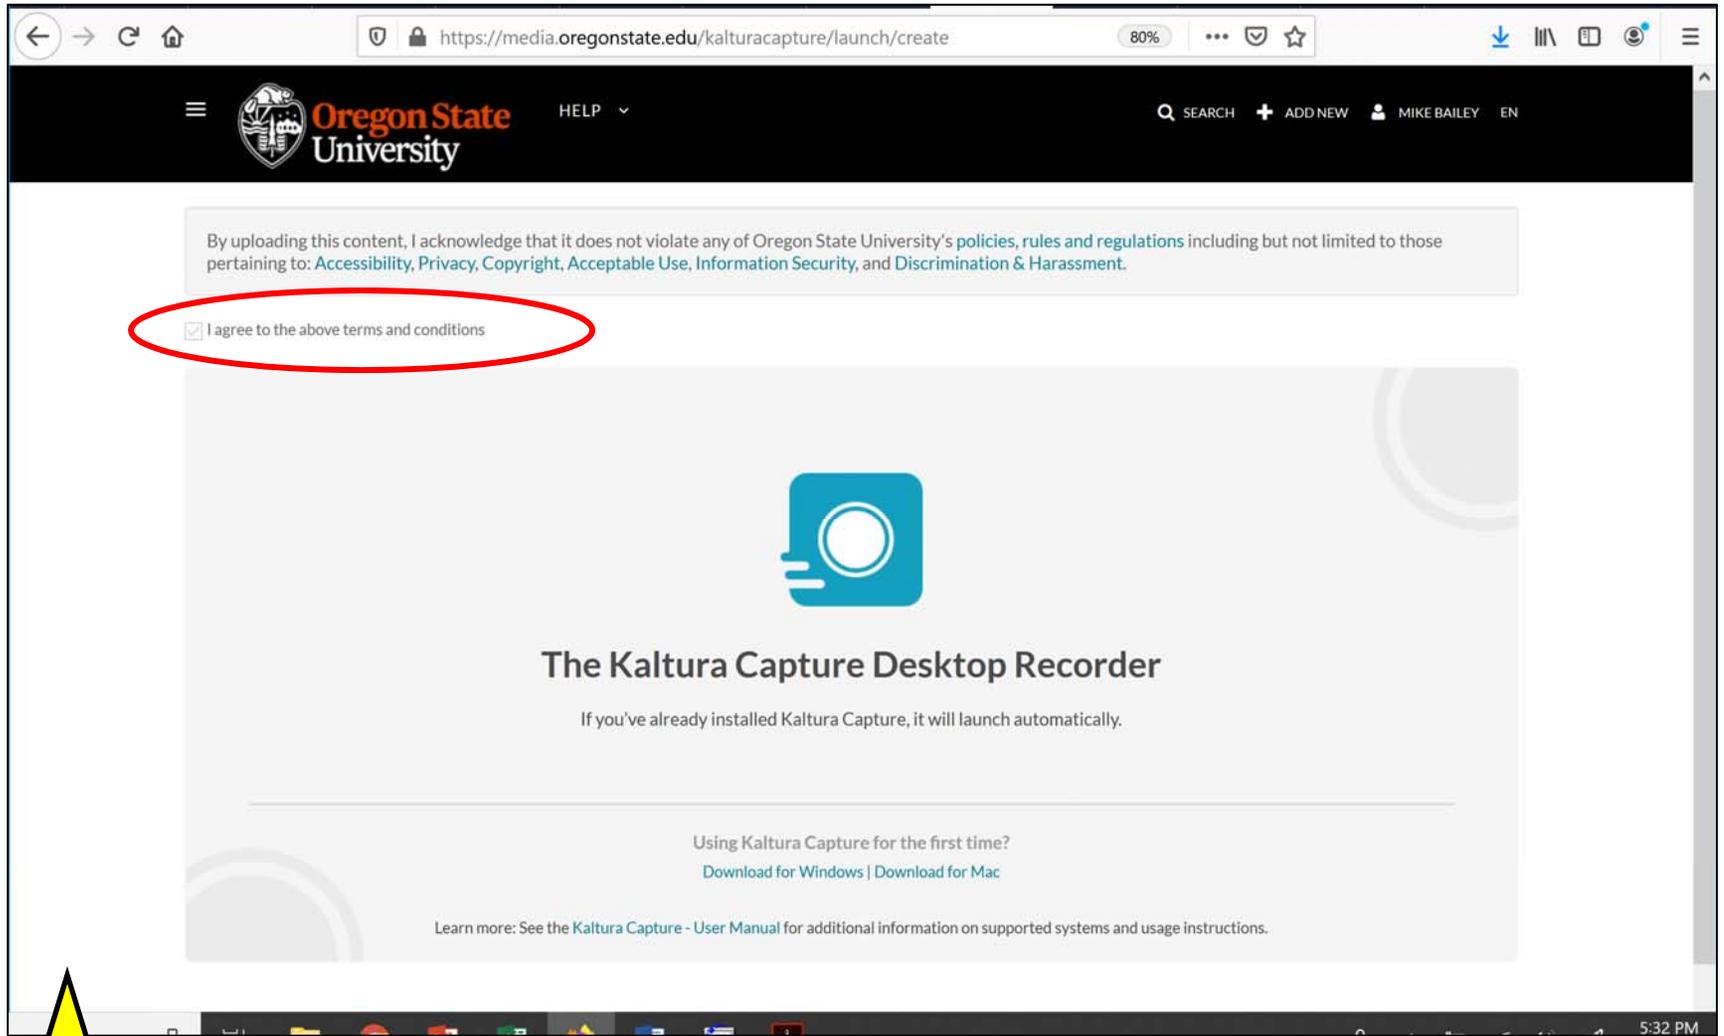

# Ask to add a new recording using the Recording Tools

If you've never done this before, a plug-in will need to be installed first. The slides marked with the yellow star show this process. If you have done this before, you can skip around the yellow-star slides.

# Of course you agree -- Resistance is futile

## Download the proper version

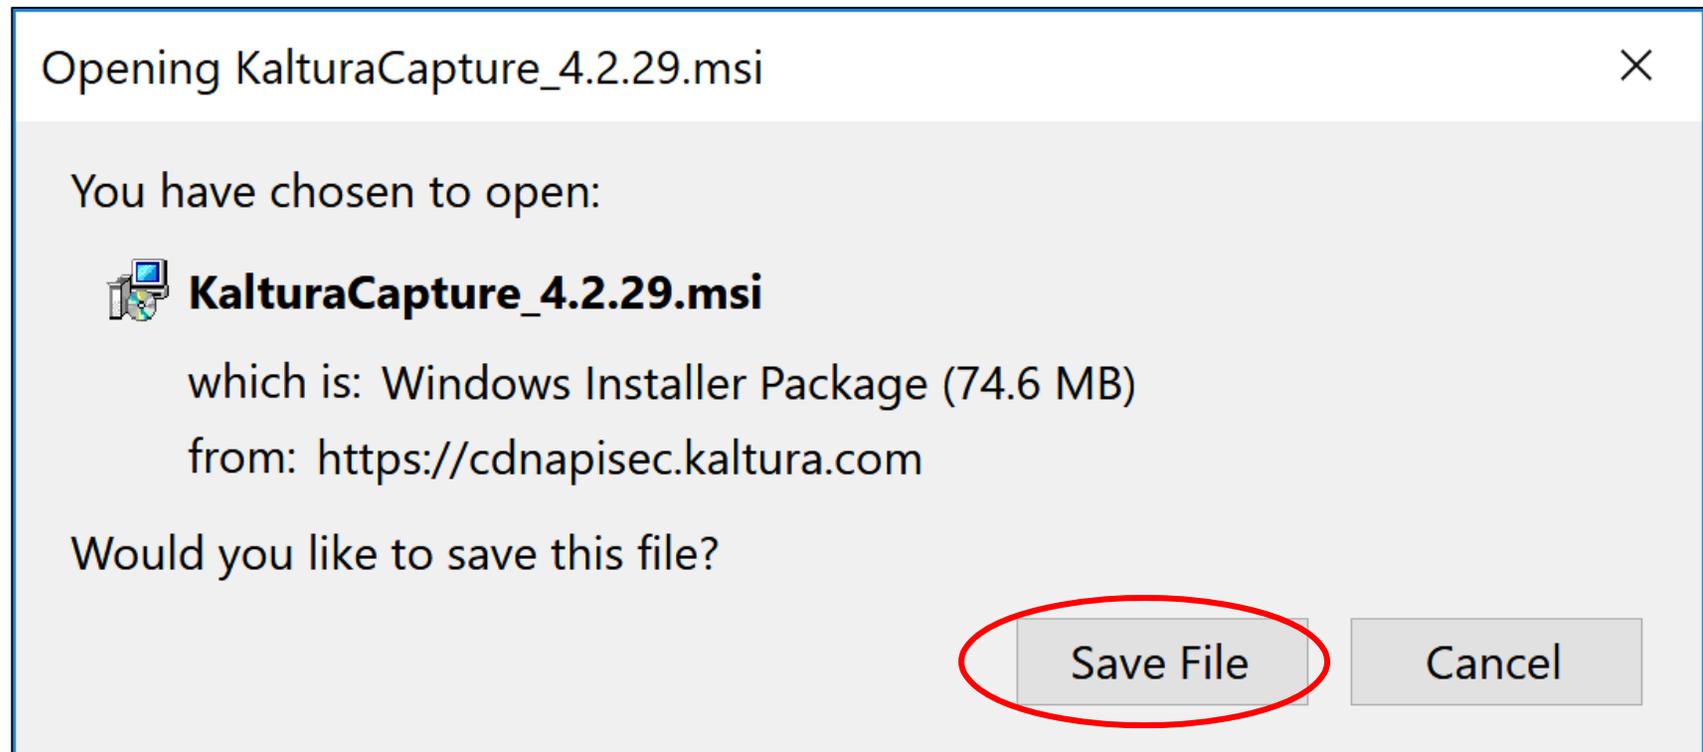

### The Kaltura Capture Desktop Recorder

If you've already installed Kaltura Capture, it will launch automatically.

Using Kaltura Capture for the first time?

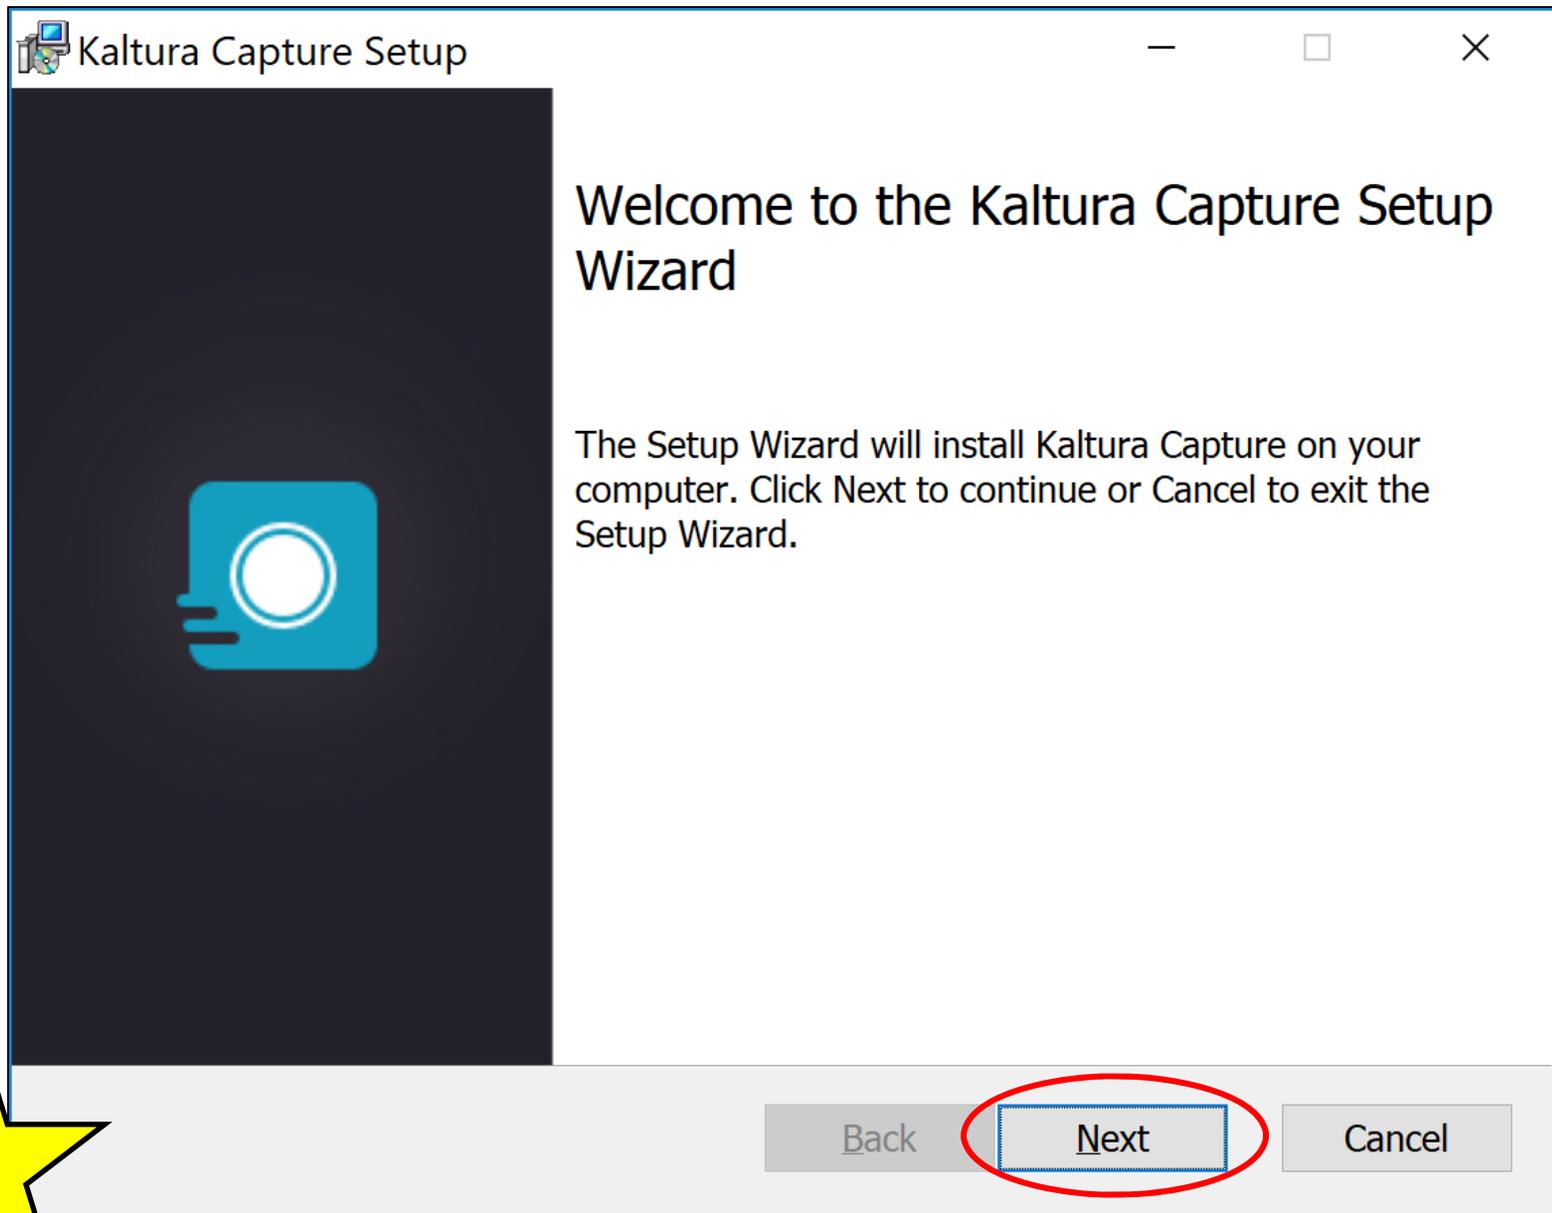

[Download for Windows](#) | [Download for Mac](#)

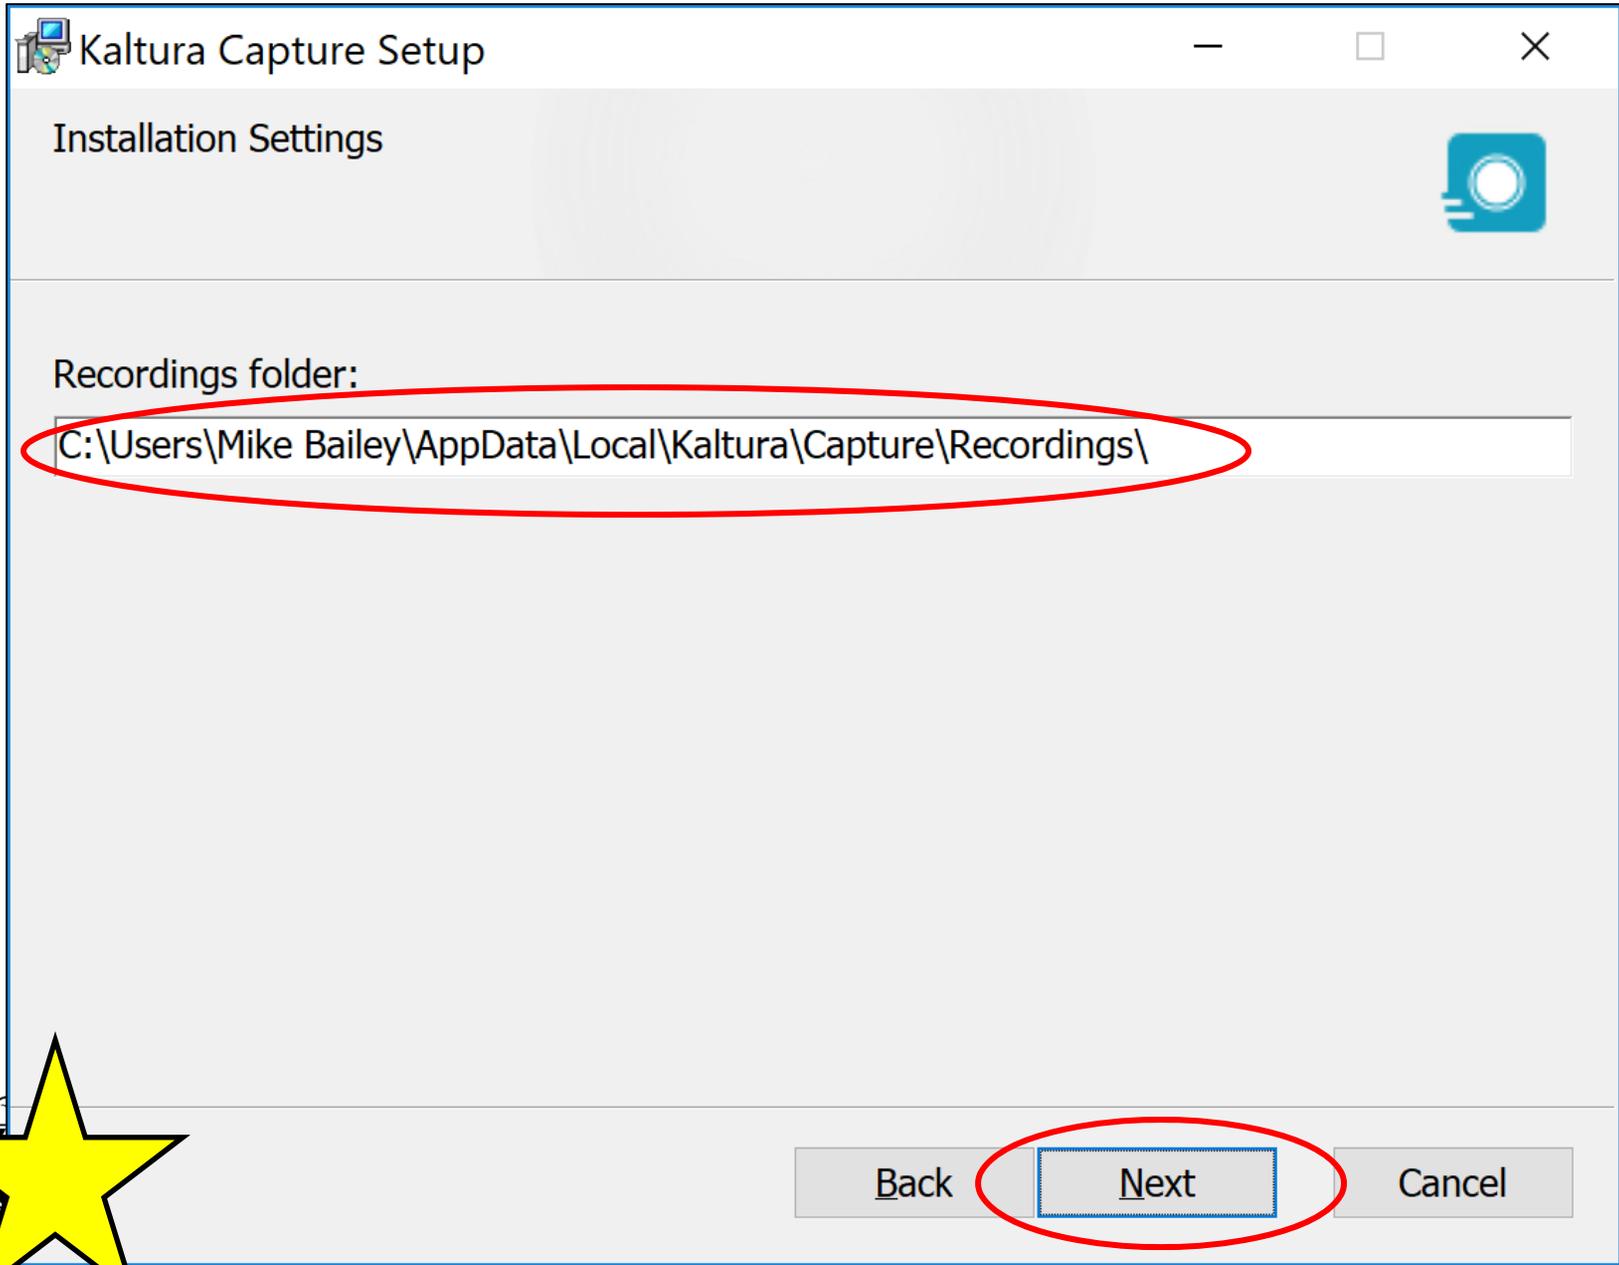

Learn more: See the [Kaltura Capture - User Manual](#) for additional information on supported systems and usage instructions.

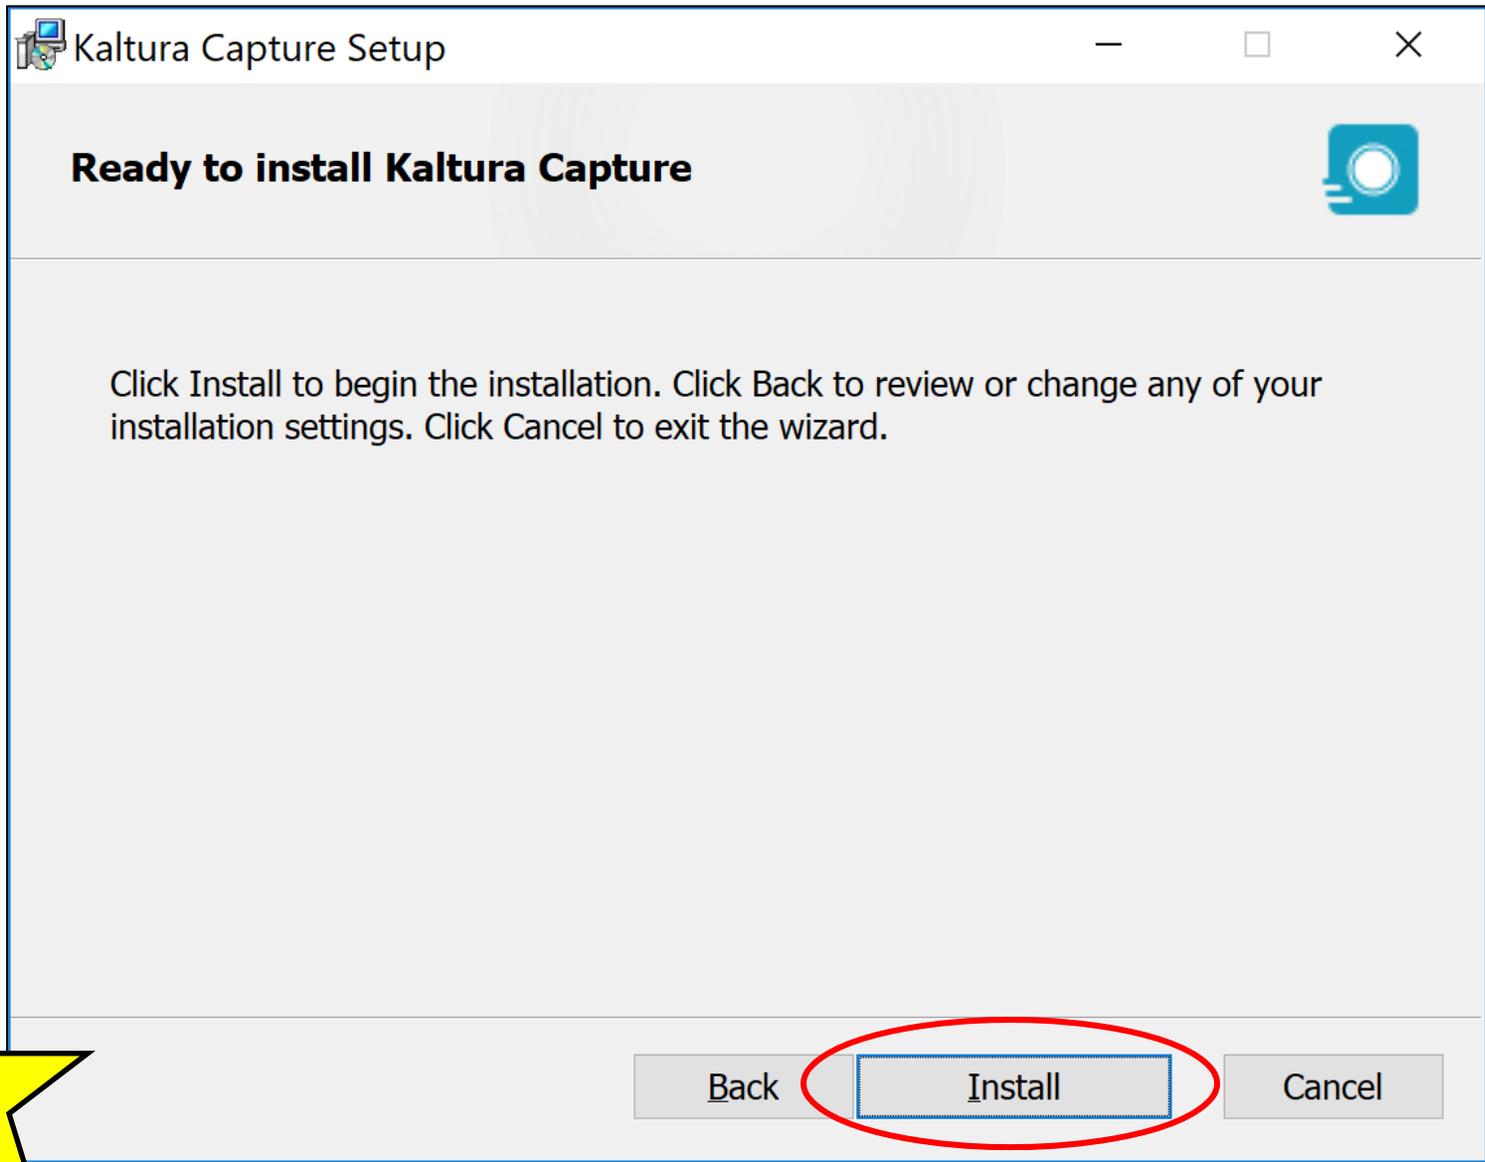

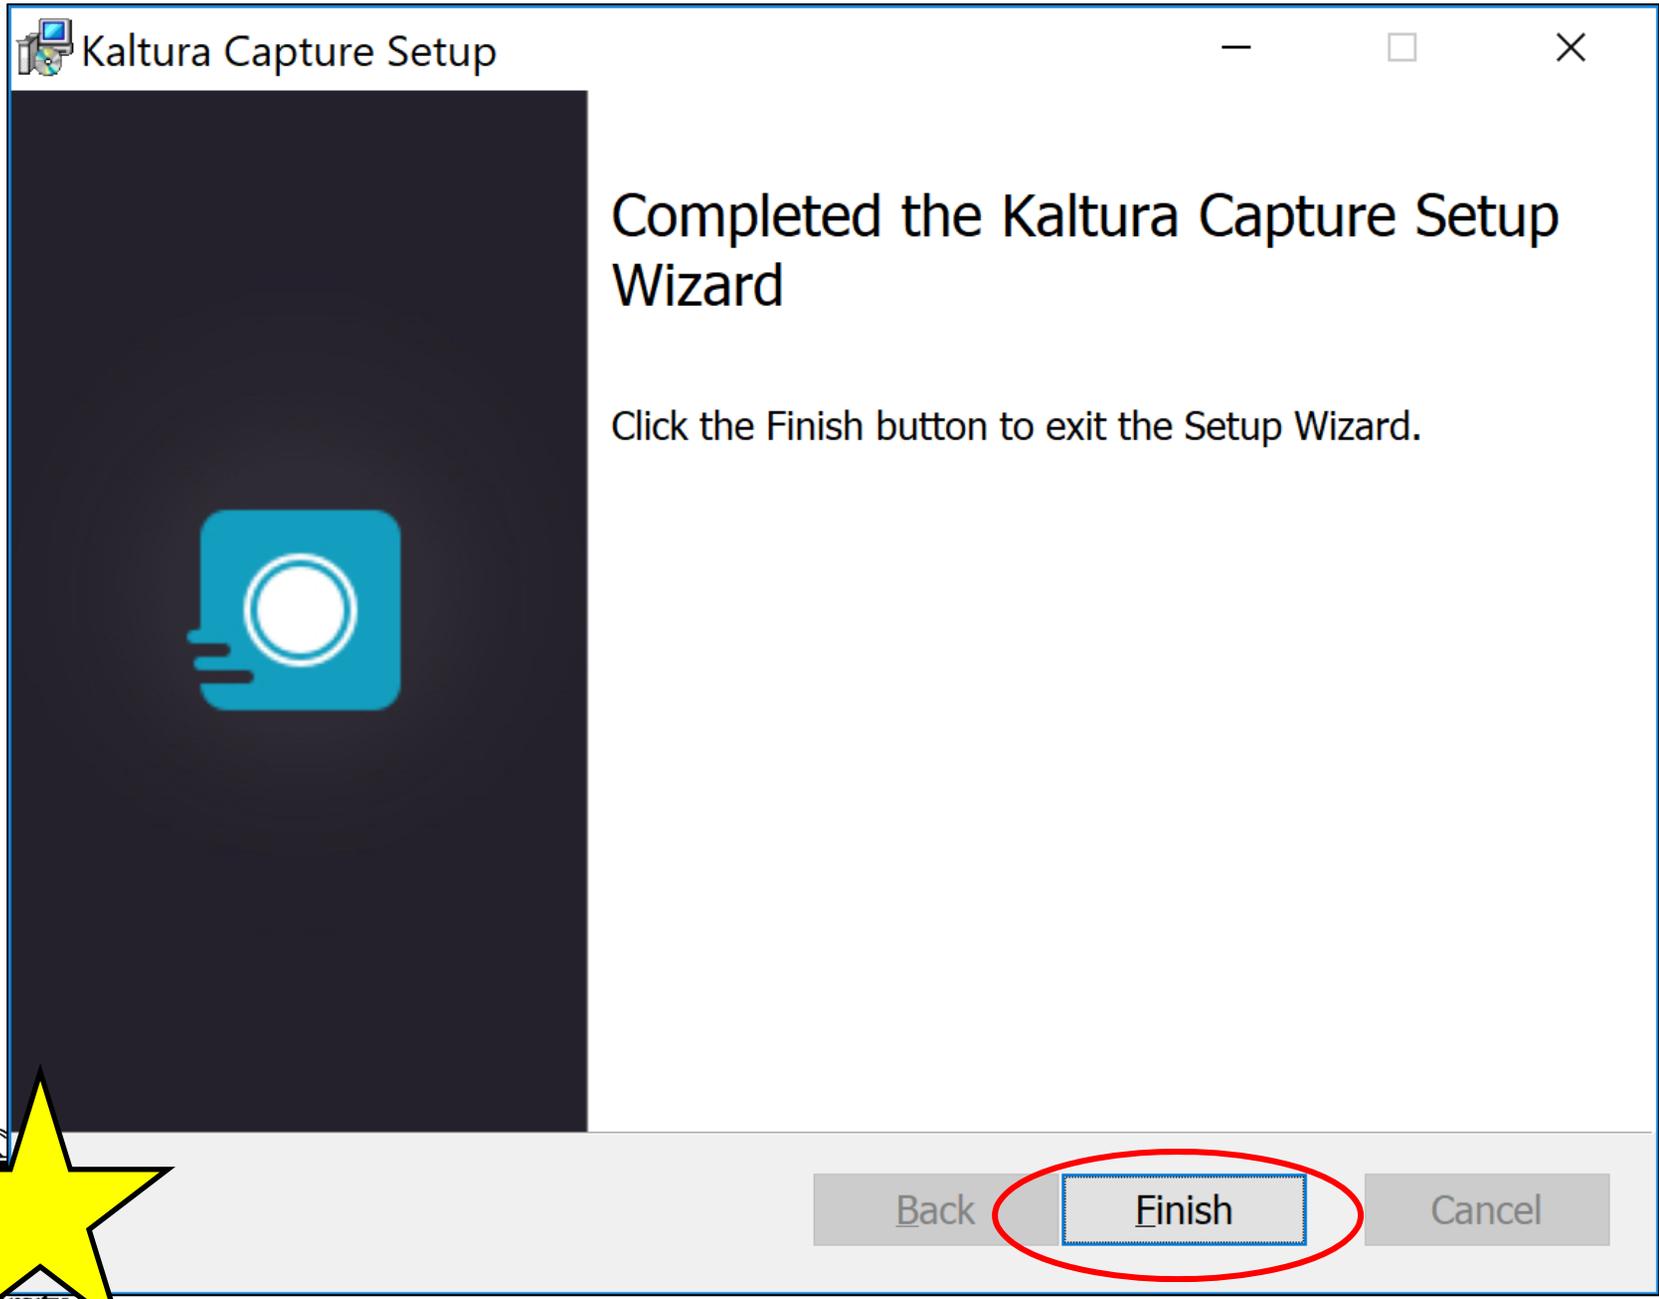

**I like to just save it on the Desktop so I can easily find it later**

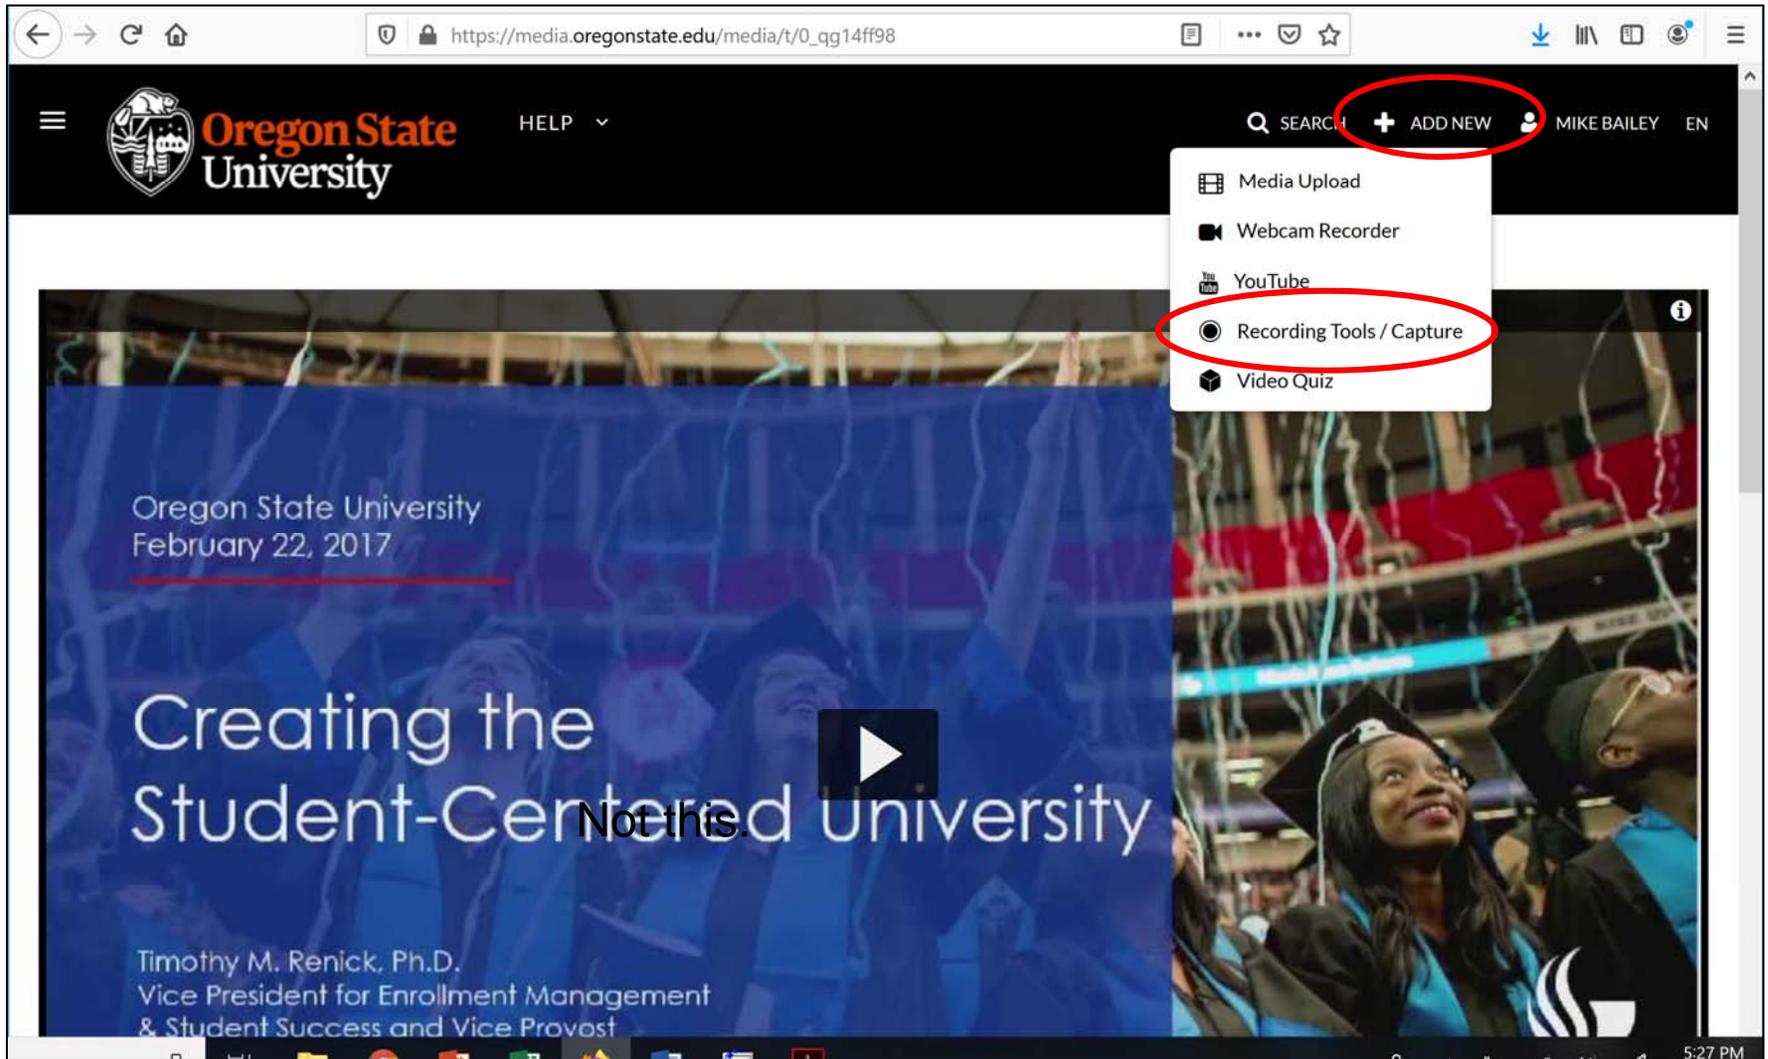

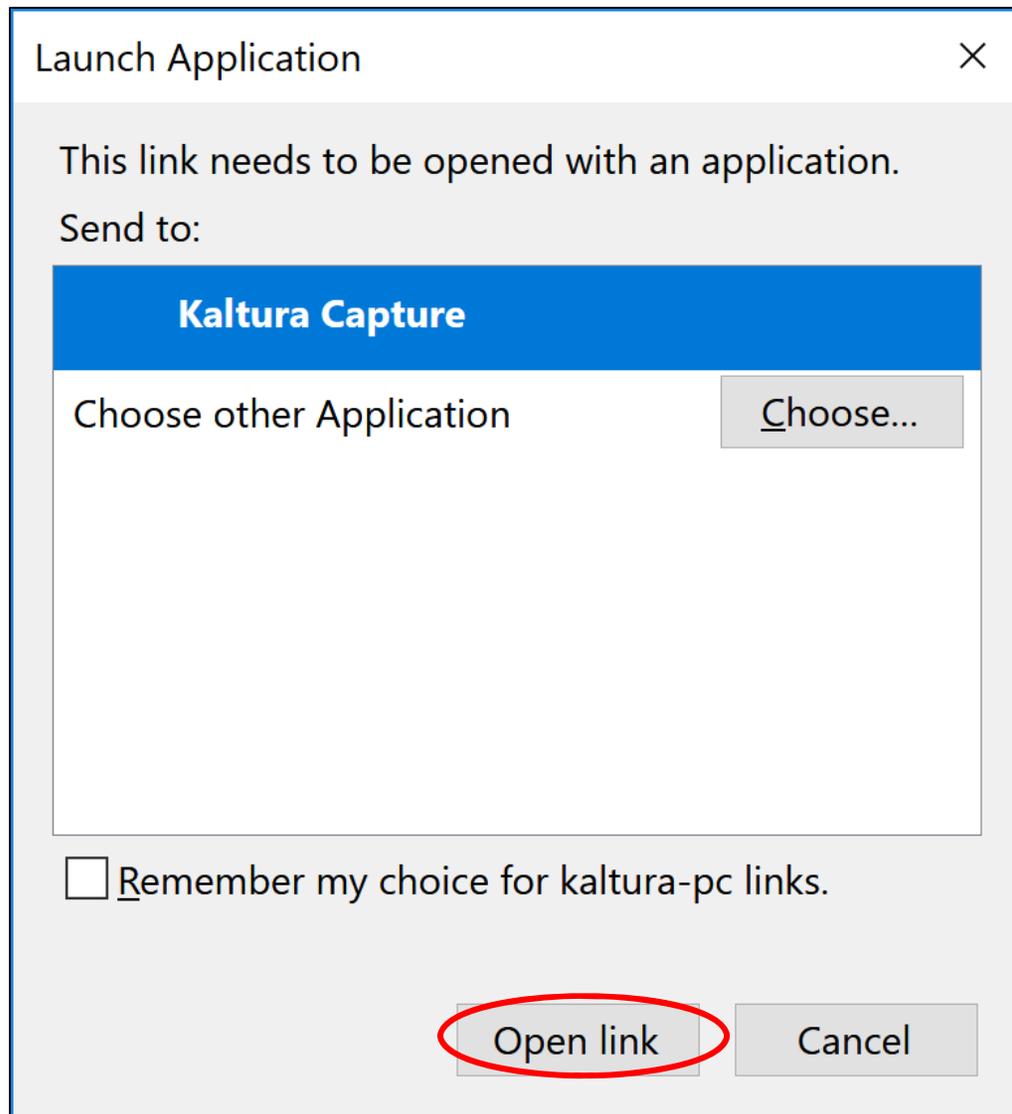

# Go back and ask again to add a new recording using the Recording Tools

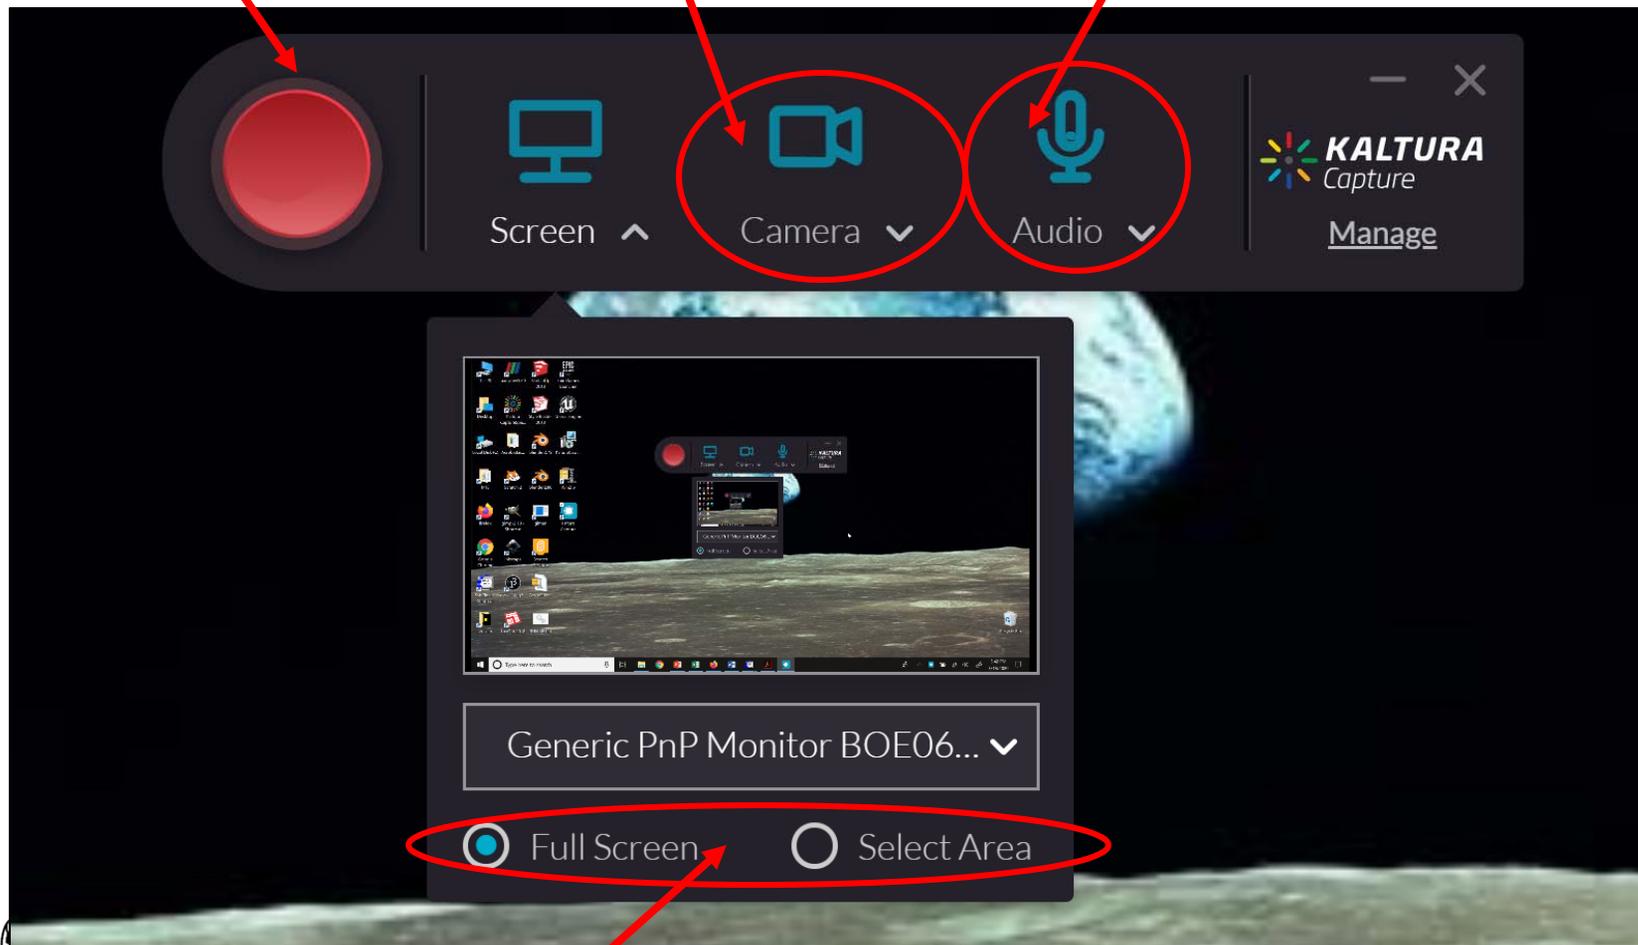

Do you want to record your face?

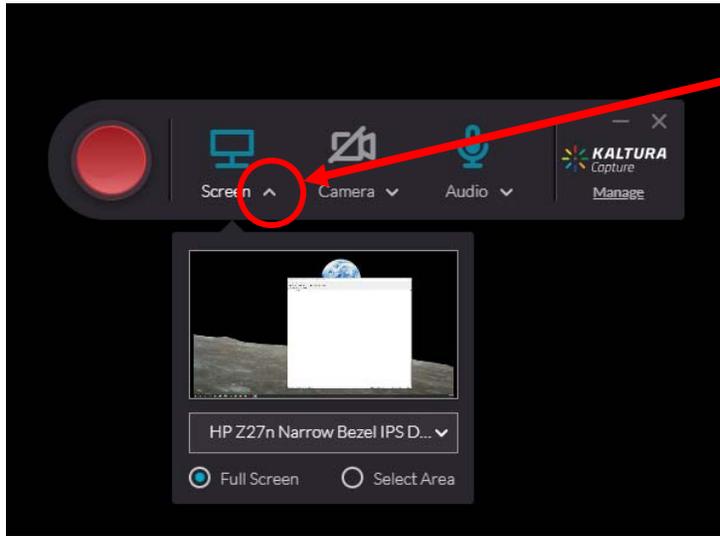

Start recording!

How do you want to record your voice?

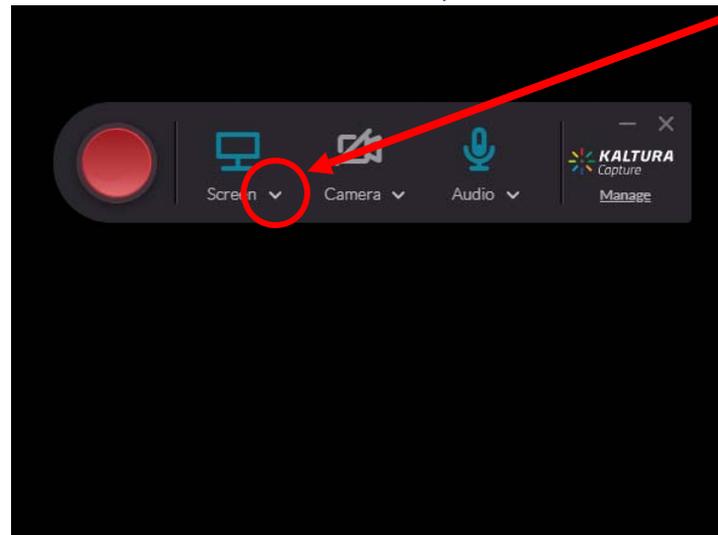

Do you want to record the whole screen or just a subset of it?

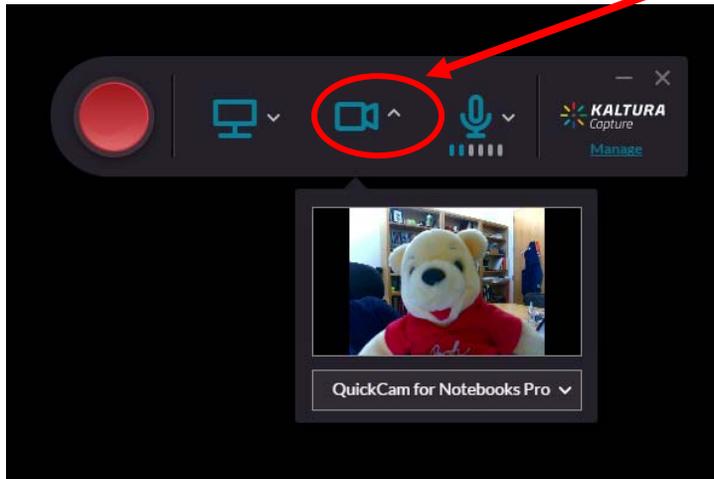

If you want the preview screen to show, click this arrow up

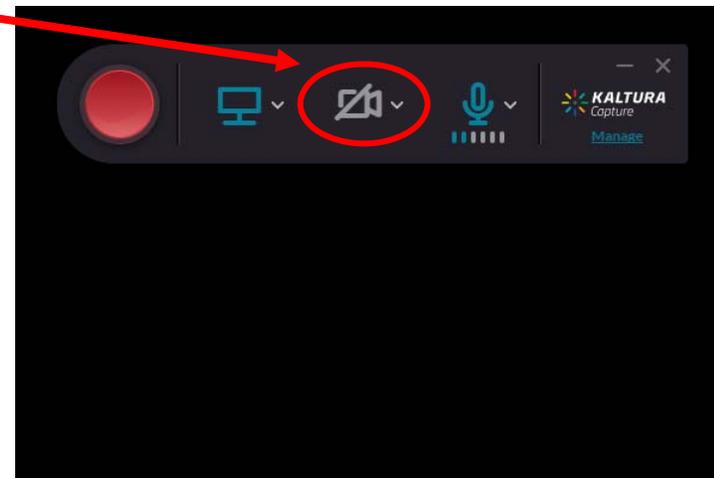

If you don't want the preview screen to show, click the arrow down

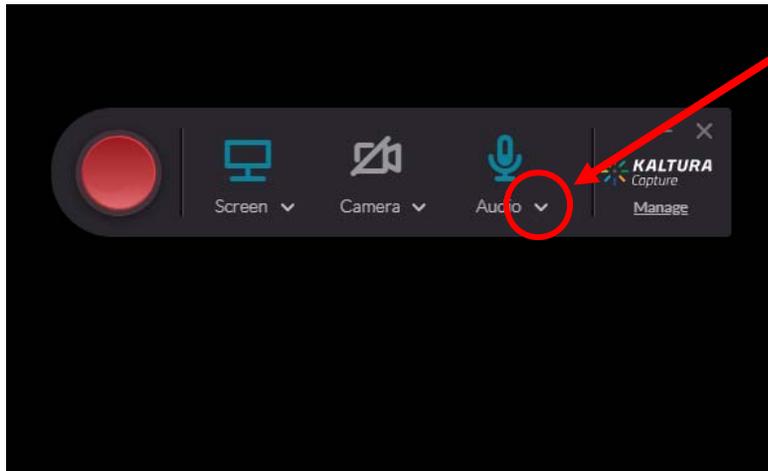

If you want to record both the screen and your face, make sure the camera icon is showing like this

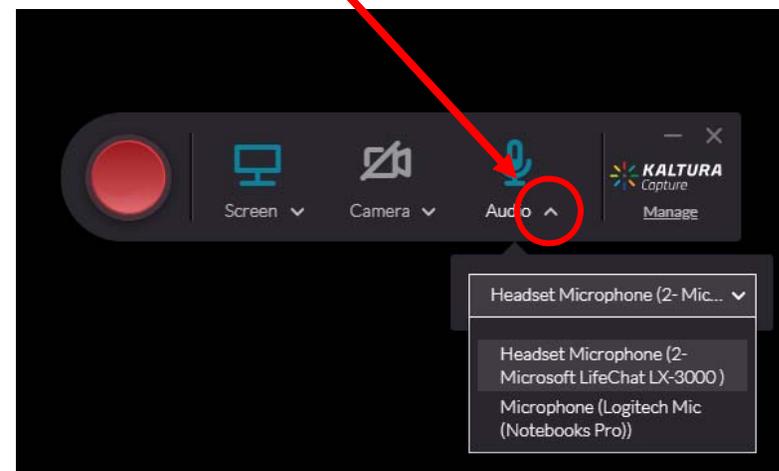

If you don't want your face recorded, click the camera icon to make it look like this

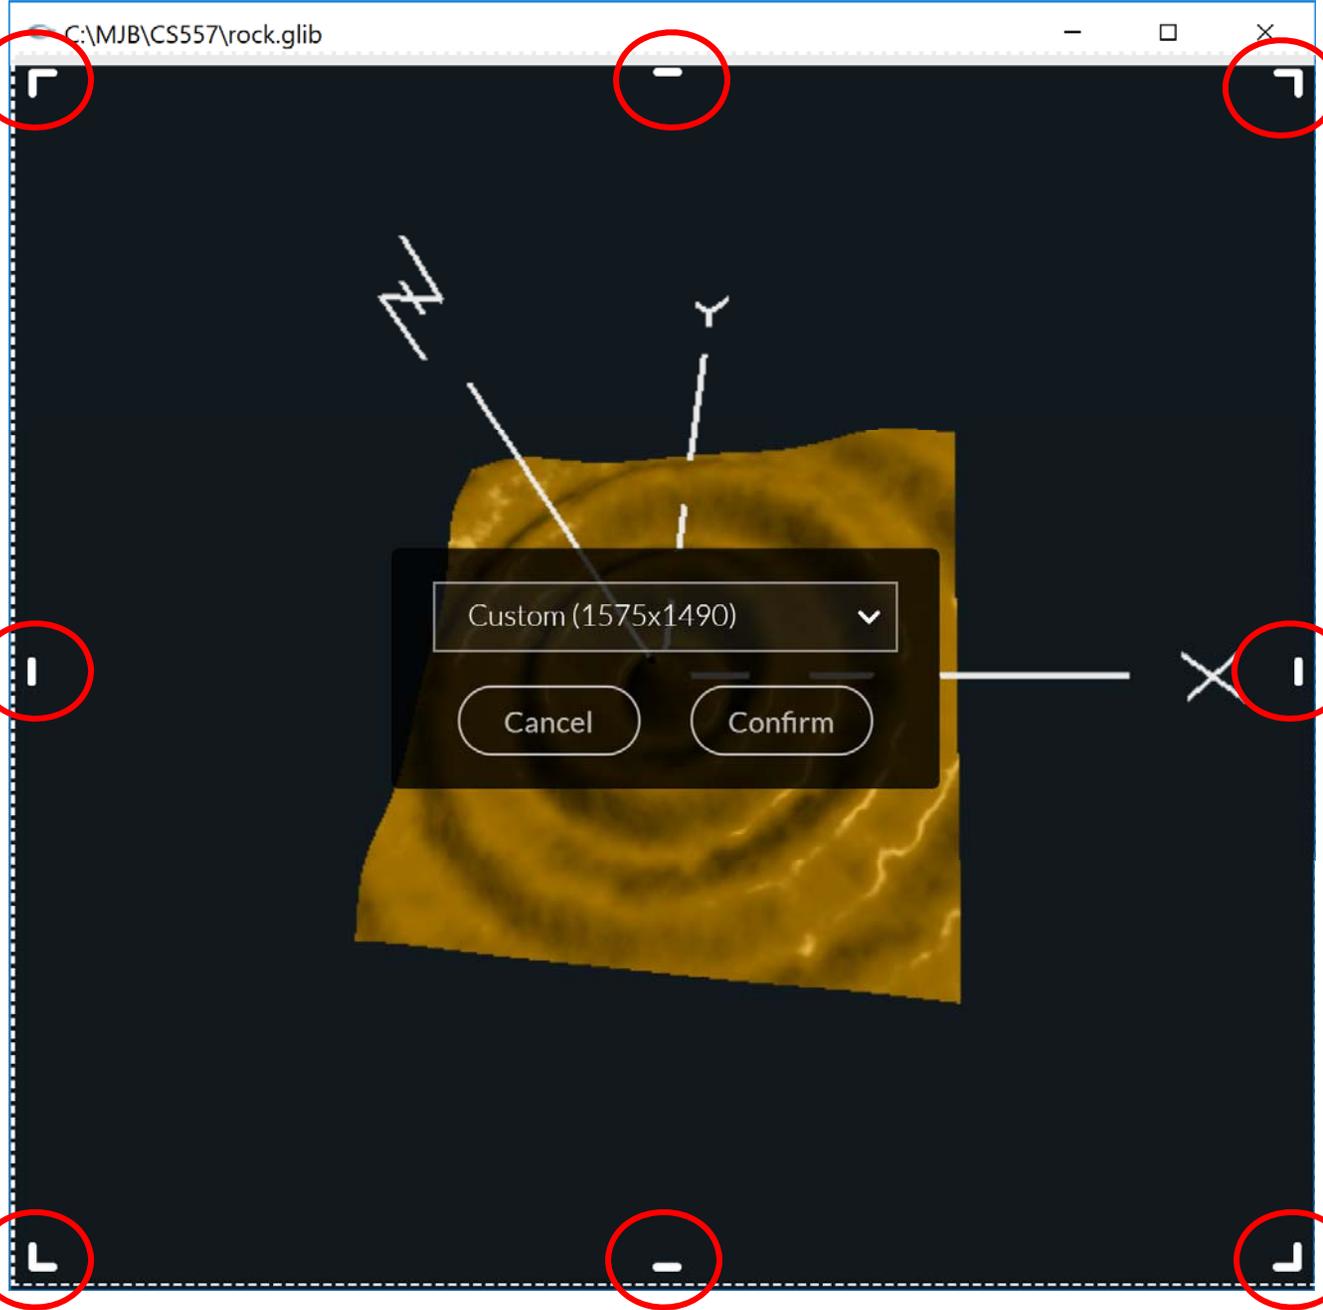

To see your audio source options, click this arrow

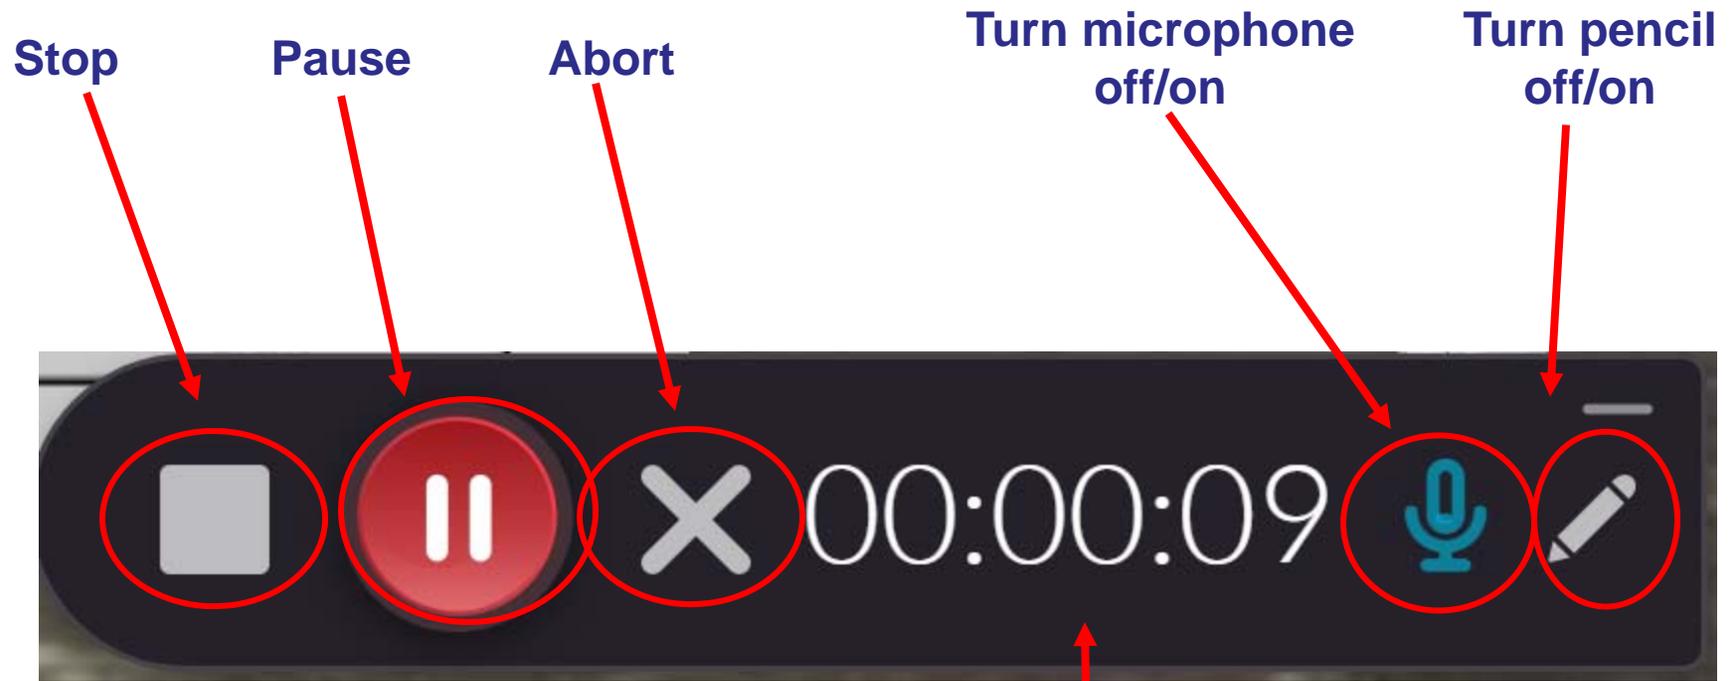

Pick the source you want, then click on the arrow again

Move these around to outline the part of the screen you want to capture

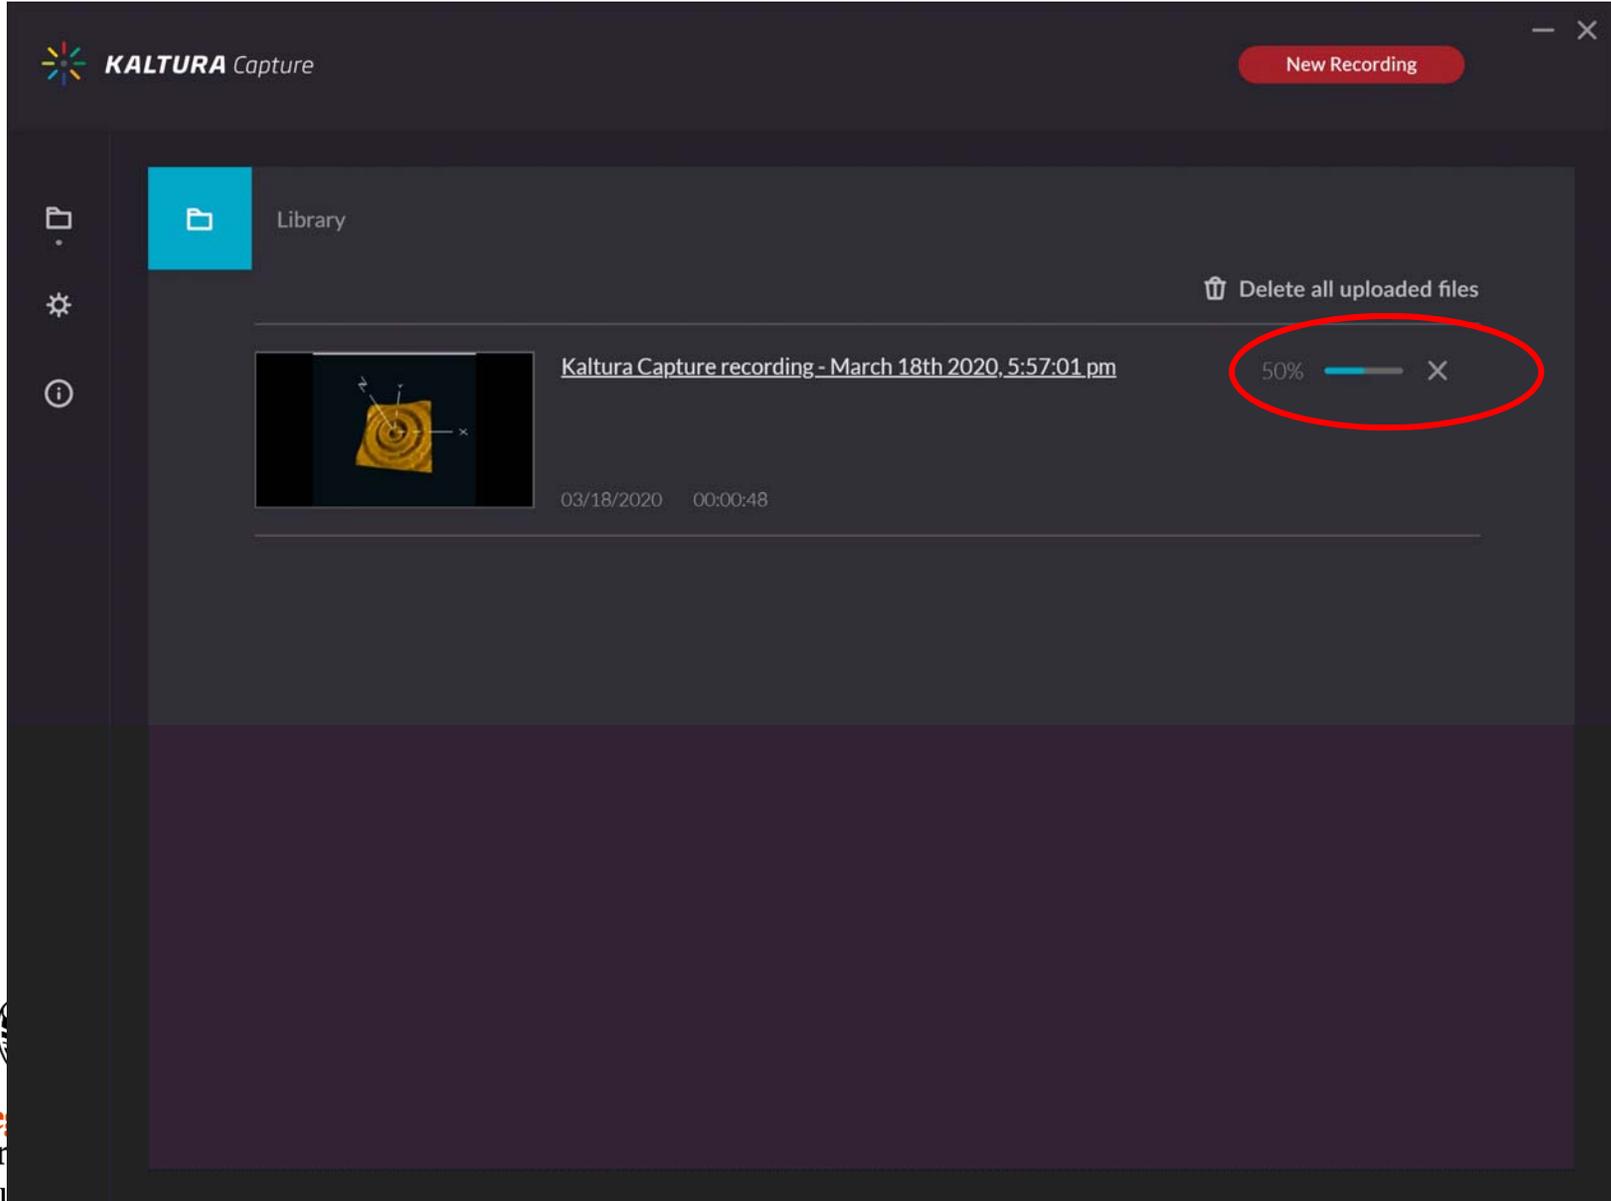

How much time you have recorded so far

## Save the recording and upload it to Media Space

The screenshot displays the KALTURA Capture application window. The title bar includes the KALTURA Capture logo and a 'New Recording' button. The main interface is divided into a left sidebar with icons for folders, settings, and information, and a central workspace. The workspace shows an 'Entry' tab with a video player. The video player has two frames: the top frame shows a 3D visualization of a yellow, circular, textured object with a coordinate system (x, y, z) overlaid; the bottom frame shows a video feed of a man wearing headphones. Below the video player is a progress bar showing '00:00:00 / 00:00:48' and the date '03/18/2020'. To the right of the video player is a form for editing the entry, with fields for 'Title' (containing 'Kaltura Capture recording - March 18th 2020'), 'Description', and 'Tags'. At the bottom right of the interface are three buttons: 'Delete', 'Save & Upload' (which is circled in red), and 'Save'. A 'Go to library' link is located in the top right corner of the workspace.

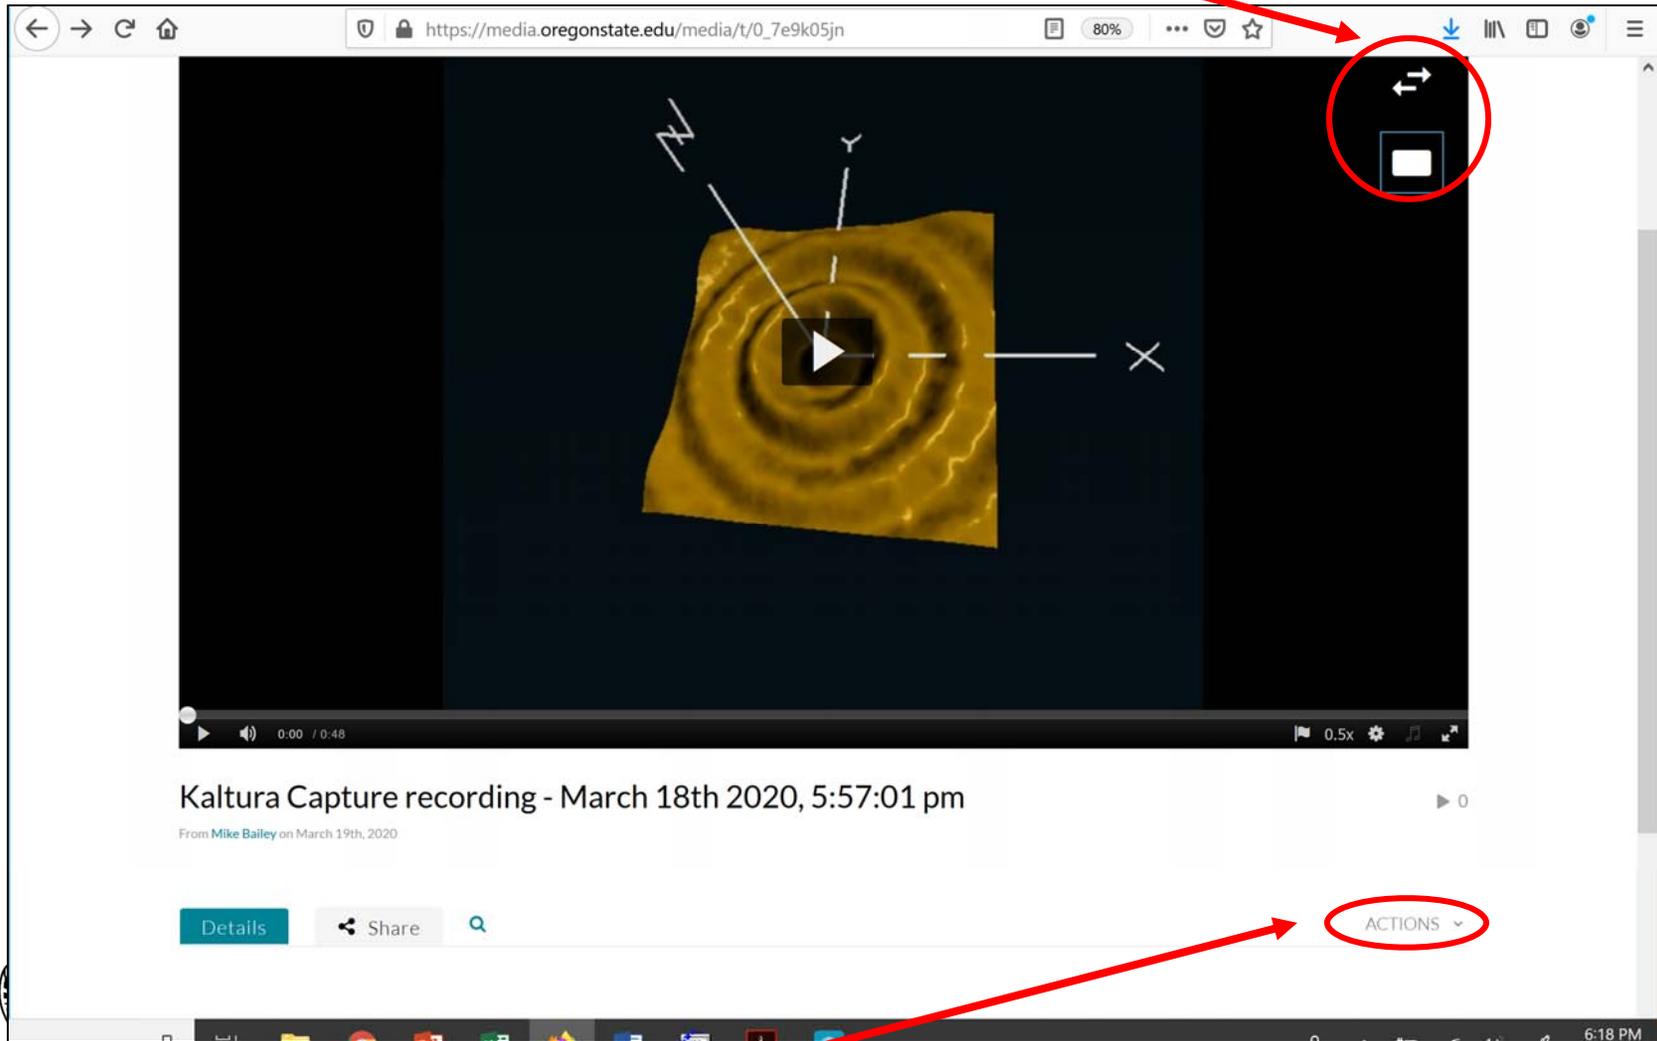

# Kaltura shows you your uploading progress

# Go back to the Media home page and see your new recording in My Media

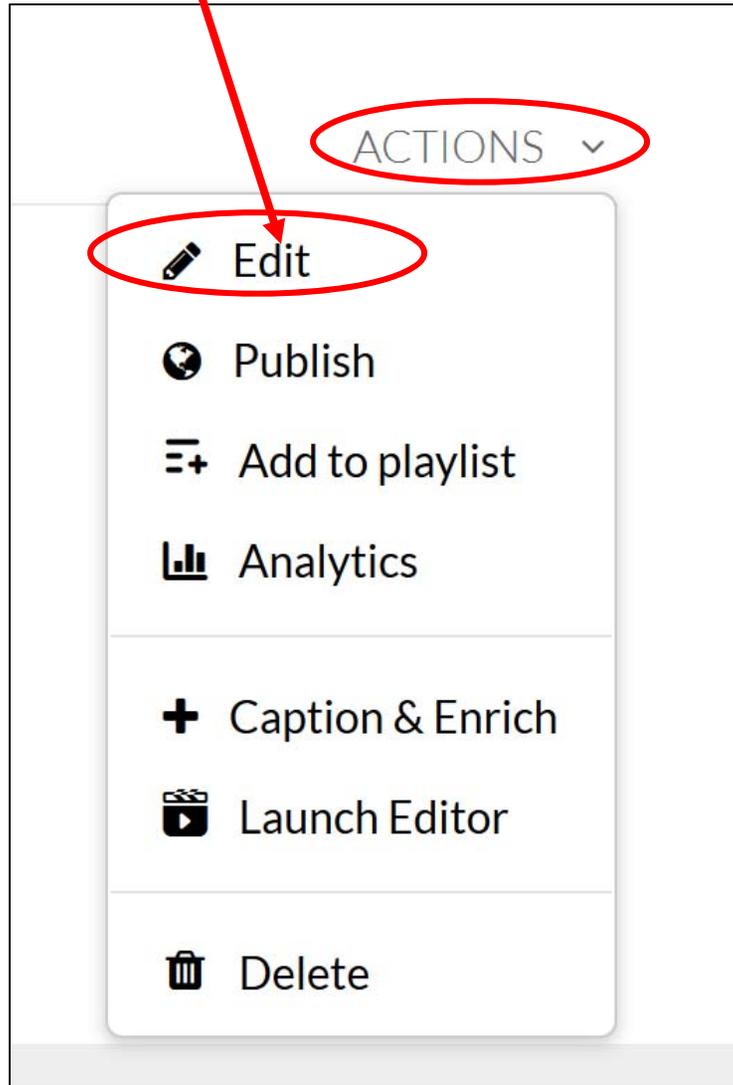

The screenshot shows a web browser window at the URL <https://media.oregonstate.edu/my-media>. The page header includes the Oregon State University logo, a 'HELP' dropdown, a search bar, and a user profile for 'MIKE BAILEY' with an 'EN' language indicator. A dropdown menu is open under the user profile, listing 'My Media', 'My Playlists', 'My Channels', 'My History', and 'Logout'. The main content area is titled 'My Media' and features a search bar and filter options: 'Search In: All Fields' and 'Sort By: Creation Date - Descending'. A red oval highlights a video recording titled 'Kaltura Capture recording - March 18th 2020, 5:57:01 pm'. The video thumbnail shows a 3D coordinate system with a yellow square and a red circle. The video is marked as 'Private' and was created on March 19th, 2020. Below the video, there is a section for '2019.answers10' with a thumbnail showing a question detail interface.

Manipulate these two controls to decide how much of the screen to show versus how much of your face

This is the *Actions* pull-down menu. It is really dim.

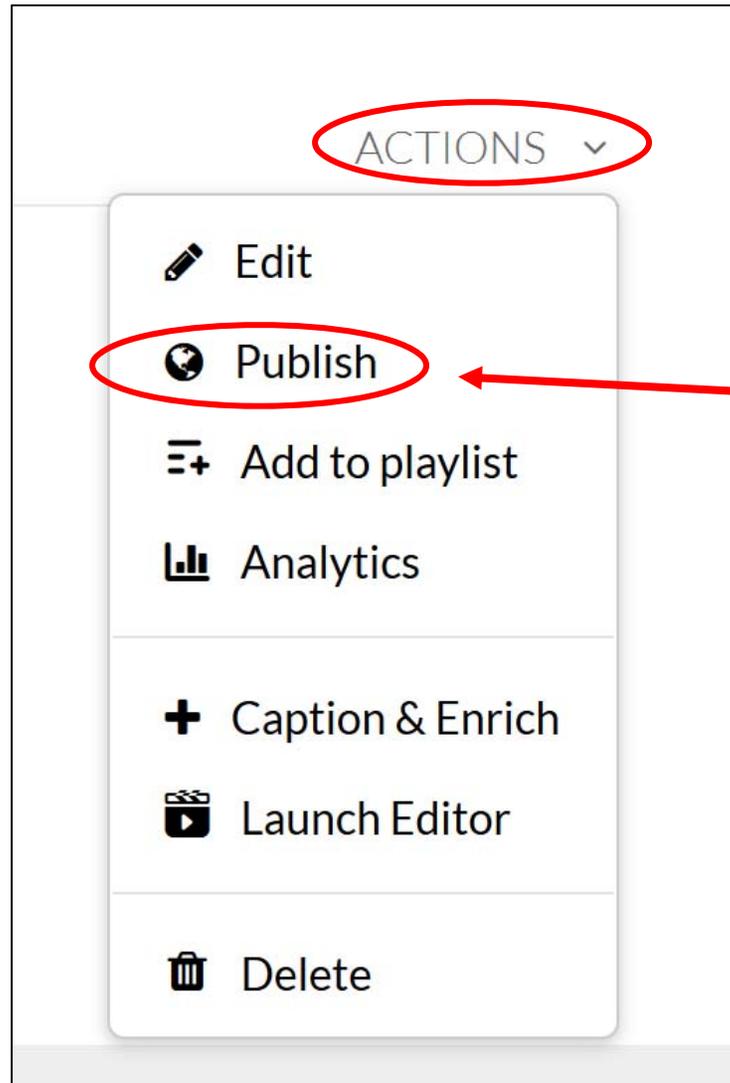

The *Actions* menu will let you see and edit the parameters of your video

Uh-oh. This recording's status is *Private*. That means that nobody will be able to look at it except you.

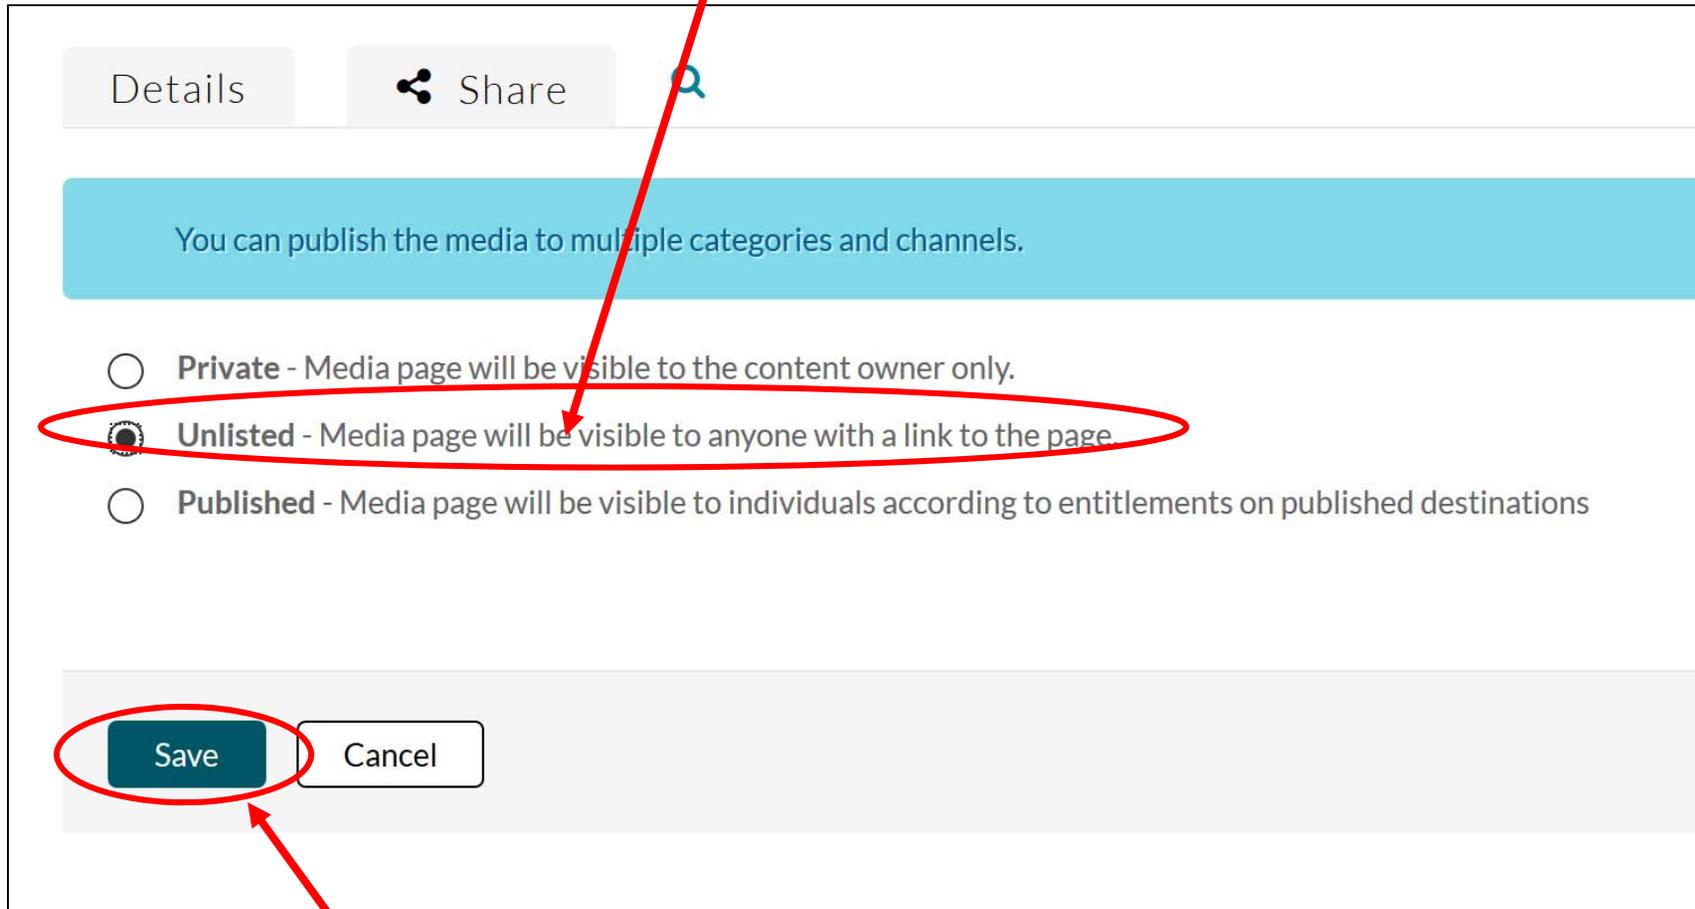

The screenshot displays the Oregon State University media editing interface. The browser address bar shows the URL [https://media.oregonstate.edu/edit/0\\_7e9k05jn](https://media.oregonstate.edu/edit/0_7e9k05jn). The page title is "Kaltura Capture recording - Marc...". A red circle highlights the "Private" status indicator next to the title. A red arrow points from the text above to this indicator. Below the video player, the "Details" tab is selected, showing the name "Kaltura Capture recording - March 18th 2020, 5:57:01 pm" and a "Description" field. An inset window shows the "Edit" screen with the "Private" status highlighted in an orange box.

## The *Actions* menu to the rescue again!

**Use this to set your recording status to *Unlisted*!**

***Unlisted*** means that anyone who knows the URL of your video, which you will give them, can look at it.

Details Share

You can publish the media to multiple categories and channels.

Private - Media page will be visible to the content owner only.

**Unlisted** - Media page will be visible to anyone with a link to the page.

Published - Media page will be visible to individuals according to entitlements on published destinations

Save Cancel

**Be sure to Save! Not doing that will forget that you changed to *Unlisted*.**

## Sharing your video with others

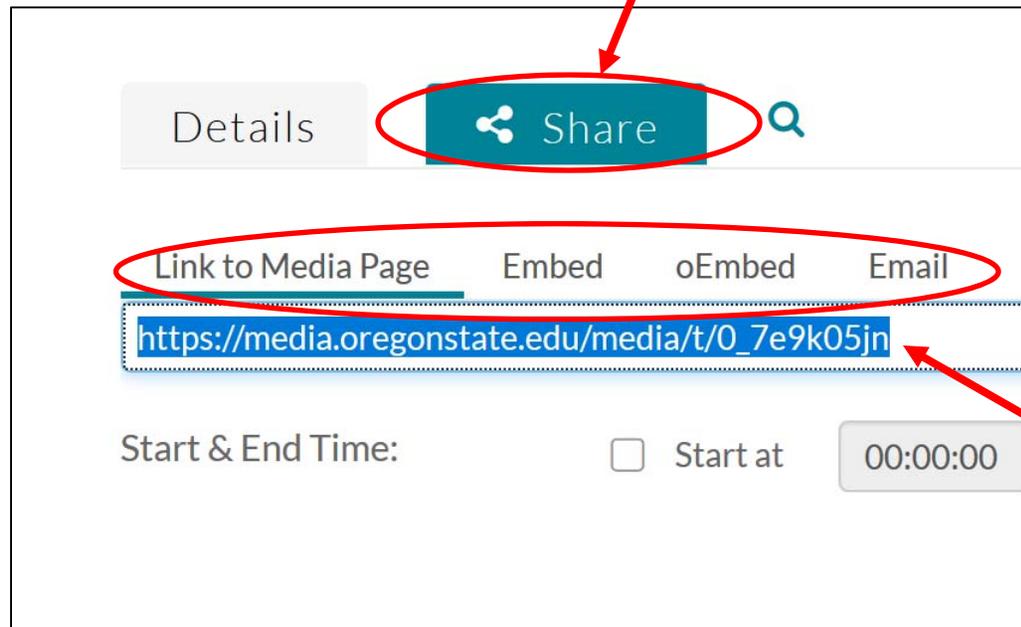

You can link and embed your video in your own web pages.

Click on your video to play it.

Underneath the video, there's a *Share* button.

Clicking this button gives you options for:

"Link to Media Page", "Embed", "oEmbed", and "Email".

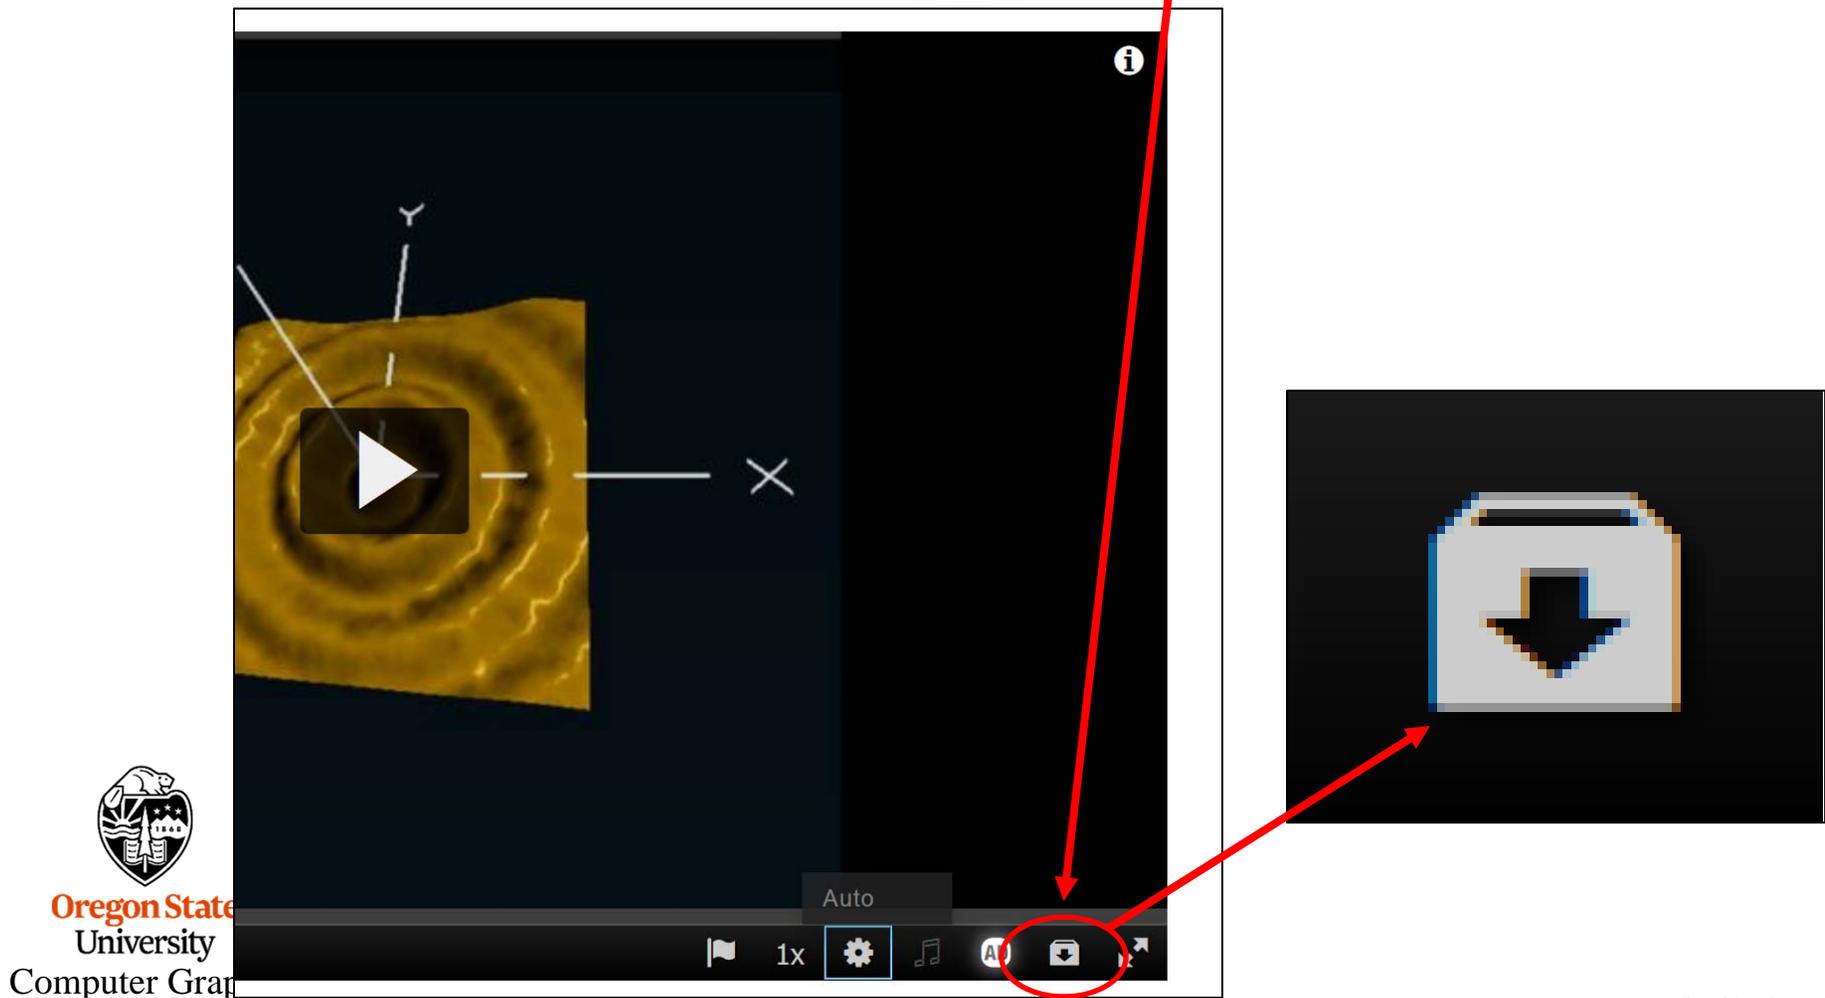

Copy and paste this text into your HTML or Word document

After you leave OSU, your material stays right here on OSU's Media Space server. Apparently we don't have any retention rules for now. However, that could always change, so you should be sure to save a copy of your best videos somewhere else.

## Downloading your video as an MP4 file

This is helpful if you want to let people download it and play it locally.

Select *Actions*, then *Edit*, then the *Download* button

## Downloading your video as an MP4

Pressing the Download button will bring up a dialog box which will let you save the video as an MP4 file.
