## What is Kaltura?

**Kaltura** is a web-based screen-recording application. OSU owns a site license to it, which means that all students and staff can use it at no cost to themselves. We will use it so that you can show off your great project without you and us having to be sitting together.

You don't need to use this video as a way to explain your report. I will read the report to get that information. Likewise, don't use the video to walk me through the code. Use this video as a way to show what it looks like when it runs. If I want to see your code, I will go look at it separately. Show off all the required features. Show off anything you have done that is extra and cool. Cool is always good!

If you have a microphone, use it! It is easier for us to figure out what your features do if you are telling us.

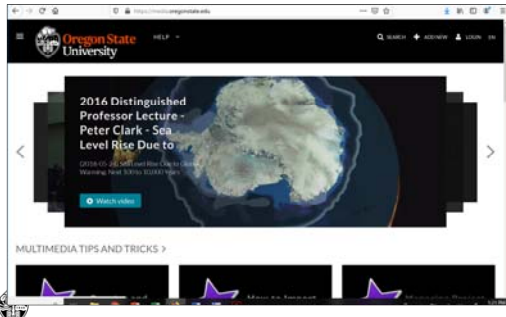

To finish grading each project, we will need to watch a lot of videos. Have mercy on us and keep your video short and to the point. Show us all your different program features, but once you have demonstrated a feature, move on to the next one. Do the math –  $M$  minutes per video times  $P$  people in the class, gives ...

6

Ask to add a new recording using the Recording Tools

Oregon State University  
Computer Graphics

mb - March 23, 2020

**Not this.**

If you've never done this before, a plug-in will need to be installed first. The slides marked with the yellow star show this process. If you have done this before, you can skip around the yellow-star slides.

7

Of course you agree -- Resistance is futile

The Kaltura Capture Desktop Recorder

If you've already installed Kaltura Capture, it will launch automatically.

Using Kaltura Capture for the first time?  
[Download for Windows](#) | [Download for Mac](#)

Learn more: See the Kaltura Capture - User Manual for additional information on supported systems and usage instructions.

Opening KalturaCapture\_4.2.29.msi

You have chosen to open:

**KalturaCapture\_4.2.29.msi**  
 which is: Windows Installer Package (74.6 MB)  
 from: <https://cdnapisec.kaltura.com>

Would you like to save this file?

[Save File](#) [Cancel](#)

I like to just save it on the Desktop so I can easily find it later

mb - March 23, 2020

25

Manipulate these two controls to decide how much of the screen to show versus how much of your face

**This is the Actions pull-down menu. It is really dim.**

Oregon State University  
Computer Graphics

mb - March 23, 2020

26

The Actions menu will let you see and edit the parameters of your video

Oregon State University  
Computer Graphics

mb - March 23, 2020

27

Uh-oh. This recording's status is *Private*. That means that nobody will be able to look at it except you.

Oregon State University  
Computer Graphics

mb - March 23, 2020

28

The Actions menu to the rescue again!

Use this to set your recording status to *Unlisted*!

Oregon State University  
Computer Graphics

mb - March 23, 2020

29

*Unlisted* means that anyone who knows the URL of your video, which you will give them, can look at it.

**Be sure to Save! Not doing that will forget that you changed to *Unlisted*.**

30

Sharing your video with others

You can link and embed your video in your own web pages. Click on your video to play it. Underneath the video, there's a *Share* button. Clicking this button gives you options for:

"Link to Media Page", "Embed", "oEmbed", and "Email".

Copy and paste this text into your HTML or Word document

After you leave OSU, your material stays right here on OSU's Media Space server. Apparently we don't have any retention rules for now. However, that could always change, so you should be sure to save a copy of your best videos somewhere else.

### Downloading your video as an MP4 file

31

This is helpful if you want to let people download it and play it locally.

Select *Actions*, then *Edit*, then the *Download* button

 mjb - March 23, 2020

### Downloading your video as an MP4

32

Pressing the Download button will bring up a dialog box which will let you save the video as an MP4 file.
