Geometric Morphing with the Vertex Shader

mjb@cs.oregonstate.edu
Morphing a Sphere into a Circle

- Blend = 0.00
- Blend = 0.25
- Blend = 0.50
- Blend = 0.75
- Blend = 1.00
out vec2  vST;
out float  vLightIntensity;
out vec3  vColor;
const float TWOPI = 2.*3.14159265;

// original model coords (sphere):
vec4 vertex0  = gl_Vertex;
vec3 norm0   = gl_Normal;

// circle coords:
vec4 circle  = vec4( radius*cos(theta), radius*sin(theta), 0., 1. );
vec3 circlenorm = vec3( 0., 0., 1. );

vST += vec2( OffsetS, OffsetT );

// blend:
vec4 theVertex = mix( vertex0, circle, Blend );
vec3 theNormal = normalize(  mix( norm0, circlenorm, Blend )  );

// do the lighting:
vec3 tnorm   = normalize( vec3( uNormalMatrix * theNormal ) );
vec3 LightPos = vec3( 5., 10., 10. );
vec3 ECposition = vec3( uModelViewMatrix * theVertex );
vLightIntensity = abs( dot( normalize(LightPos - ECposition), tnorm ) );

vColor = gl_Color.rgb;
gl_Position = gl_ModelViewProjectionMatrix * theVertex;
A possible vis application??
What an interesting 2D view of Earth!

Original texture map

Mapped onto a Sphere

Morphed into a Circle
Morphing a Cow into a Sphere

vec4 vertex = gl_Vertex;
vertex.xyz *= 4. / length(vertex.xyz);

Note: the “face” in the sphere cow is there because the normals were not morphed into sphere normals – they were left as cow normals.
Morphing a Cow into a Cube

```cpp
const float SIDE = 2.;
vec4 vertex = gl_Vertex;
vertex.xyz *= 4. / length(vertex.xyz);
vertex.xyz = clamp( vertex.xyz, -SIDE, SIDE );
```

Note: the “face” in the cube cow is there because the normals were not morphed into cube normals – they were left as cow normals
For you movie fans, what about “Real Morphing”?  

“Real Morphing” involves interpolating key points from one object into key points in another. This flies in the face of graphics hardware’s philosophy of dealing with one triangle and then getting rid of any record of it. Movies do this in software. We got away with it in our class because we knew the equation of a disk, a sphere, and a cube and so could interpolate in a vertex shader.

The first movie-morphing I remember seeing is from the fantasy movie Willow:

https://www.youtube.com/watch?v=IKzbsDG58pc
The “making of” video for this is here:
https://www.youtube.com/watch?v=kxVwNIZDQJ0

But, my nomination for #1 morphing ever is in Michael Jackson’s Black or White video:
https://www.youtube.com/watch?v=F2AitTPI5U0
The morphing starts at around 05:30.
