Motion

```

when green flag clicked
  move 10 steps
  turn 15 degrees
  turn 15 degrees
  point in direction 90
  point towards mouse-pointer
  go to mouse-pointer
  go to random position
  change x by 10
  change y by 10
  set x to 0
  set y to 0
  if on edge, bounce
  
```

OSU Oregon State University Computer Graphics mp - February 14, 2017

Speed

```

when green flag clicked
  when space key pressed
    broadcast message 1
  when I receive message 1
    touching mouse-pointer?
    key space pressed?
    mouse x mouse y

Make a Variable
  Speed
  set Speed to 0
  change Speed by 1

when I start as a clone
  create clone of myself
  delete this clone

move 10 steps
turn 15 degrees
turn 15 degrees
point in direction 90
if on edge, bounce

pick random 1 to 10
  
```

Scratch Handles the Directions you are Going Like a Compass Does

A circular compass diagram with eight directions labeled: N (0, 360, -360), NE (45, -315), E (90, -270), SE (135, -225), S (180, -180), SW (225, -135), W (270, -90), and NW (315, -45).

Paddle

```

When the program starts, set some good values into the variables, get everyone else going, then have the Paddle continuously follow the mouse pointer

The 'q' key can end the game

when green flag clicked
  set PaddleY to 140
  set Speed to 8
  set BallsLeft to 3
  set BricksLeft to 50
  broadcast CreateBricks
  broadcast StartGame
  forever loop
    go to x: mouse x y: PaddleY

when green flag clicked
  wait until key q pressed?
  stop all
  
```

OSU Oregon State University Computer Graphics mp - February 14, 2017

Bricks

```

Create the bricks to start with

Test to see if you've won

when I receive CreateBricks
  show
  repeat BrickCount
    create clone of Bricks
  hide

Position each brick in a random location. Then, wait for the Ball to hit the brick. When it does, decrease the brick count, bounce the Ball (which will result in a pop sound), and delete this brick.

when I start as a clone
  go to x: pick random 240 to 240 y: pick random 20 to 400
  forever loop
    wait until touching Ball?
    set BricksLeft to BricksLeft - 1
    broadcast BounceBall
    delete this clone
  
```
