

CV ROBOTICS TEAM 955

Parent or Guardian,

Welcome to CV Robotics. We're glad you decided to join us for an exciting year of learning, designing, building, and competing.

Mentors are a cornerstone of the CV Robotics experience. Every year we need new mentors to come forward and help guide students in the organizational and engineering processes required to keep us moving forward as a team. Did I say "cornerstone?" I meant critical cornerstone.

Last year's success was due in large part to an outstanding group of dedicated mentors. Let's do it again.

Robotics mentoring is a rewarding opportunity to give back to the various communities who have helped us throughout our lives. It's also a great way to participate with the students (your student and their friends) on complex projects and team building.

We need mentors in the following areas:

Technical	Mechanical CAD	Electrical Animation	Software Web Management
Organizational	Project Management Communications Fundraising	Business Event Planning Safety	Marketing and PR Finance

Thank you for your support in helping us sustain and manage the CV Robotics program for all students and families willing to put in the time and effort needed. With your help, we hope to keep this a fully functioning team and successful program. This will help ensure the future of CV Robotics for many years to come.

We are looking forward to a great season!
