Text Circuit Analysis and Design by Ulaby, Maharbiz, & Furse
Free PDF download from <https://cad3e.eecs.umich.edu>
(Another useful free book on Signals & Systems <https://ss2-2e.eecs.umich.edu>)

HW Solutions will be posted on the class webpage with the homework assignments. Each assignment is to be submitted via Canvas (scanned PDF only) by/before the due date at 2pm. No late homework will be accepted. Homework will not be graded based on right or wrong answers, but on the level of effort shown in what you submit. Solutions are there to guide your work. Straight copying of solutions will be penalized. TAs/graders will be vigilant in cracking down on any sign of copying. Feel free to express yourself in the homework itself, if you are stuck between your efforts and not understanding the solutions. The idea is that the graders want to see your efforts put into doing the homework assignments. Homework grading will be done using one of three scores: **10**, **5**, or **0**. A “good” amount of effort and understanding demonstrated will receive a **10**; no or little work will receive **0**; and **5** for something in between. Homework problems may appear on exams.

Exams Exams will be **closed** book, **closed** notes, and **no** calculator – just your pencil/pen. I provide the “reference sheets” for the exam. This is already made available on the class website, so you know exactly what to expect. You should get used to the content well ahead of time.

OH Office hours are not intended for mini lectures. **Please ask specific questions, referring to a copy of my own writing, e.g. posted lecture notes, homework solutions.**

Grading

| | |
|-----------|------------------------------------|
| Homework | 25% |
| Midterm-1 | 25% (Tuesday Oct-28 2:05-3:15pm) |
| Midterm-2 | 25% (Tuesday Nov-25 2:05-3:15pm) |
| Final | 25% (Wednesday Dec-10 2:05-3:45pm) |

****Linear scale grading****

A 90-100%, B 80-90% (B+ 88-90%), C 70-80% (C+ 78-80%), D 60-70%, F <60%

Canvas I minimally use Canvas, to let you upload homework and to keep you informed of your course status/scores. Please don't expect me to see Canvas messages. Send me an email instead.

Academic Dishonesty (cheating) is claiming credit for the work of another person or using unauthorized materials in any academic work (e.g. exams), either through the student's own conduct or the assistance of another. See Code of Student Conduct document at <https://scs.oregonstate.edu>. **Exams:** Communicating with others or copying from others/friends... **Homework:** Copying solutions or another student's work... What will be the penalty? Receive 0% and potentially for the entire course. You will also be reported to the university.
