

Go to <https://www.zillow.com/homes/>

Click a house listing of your choice. On the menu on the right, click on the tab “Monthly payment”. Then click on “Principal and Interest”. You will see the loan’s important parameters such as APR, loan program’s length, down payment, monthly payment that goes into principal and interest (not including taxes and insurance). Use the formula you learned in class about amortization to check if Zillow gives a correct number for monthly payment. On your write-up, make sure to write the address of the house you picked.
