

Math 107: Quiz 3

1) At the end of 2019, U.S. gross national debt stood at about \$22.72479 trillion. The population at that time was about 330 million. Find the amount of debt per person and then round it to the nearest hundred dollars.

2) Express the quotient $\frac{2.56}{26583}$ in scientific notation (round your answer to 4 significant digits).

3) State the number of significant digits in the following numbers:

0.0150

1.015

5200100
