## Letter from the Director

In December of 2007 the Faculty Senate unanimously approved the updated Student Rating of Teaching (SRT) form. The SRT is expected to improve how teaching is assessed by students and help instructors better understand how they can improve their teaching. The SRT results are linked to the University's Student Learning Outcomes (<http://www.slo.umn.edu>).

Included in this report are summary statistics for the Faculty Senate approved six core items as well as demographic and Student Release items. Specific responses to the open-ended questions are provided with this summary report. Please note if your class had fewer than five students responding, no report will be generated.

Since the SRT has a set of student release (SR) items, all faculty members need to indicate whether or not they are willing to release the results of these items to ONESTOP for students to view. If you have not already done so, please go to <http://z.umn.edu/srtsrperm> to inform whether or not you wish to allow the release of these items to students.

For a fuller interpretation of the items and suggestions for improving instruction, please refer to the SRT User's Manual which may be found at: <http://oms.umn.edu/srt>. For an updated list of training resources, workshops and other sources for instructional support, you may also contact the Center for Teaching and Learning (CTL) (<http://www1.umn.edu/ohr/teachlearn>).

Thank you.
