Lecture 1

Monday, January 9, 2023   8:21 AM

Introduction to the course:

Calc I $\longrightarrow$ Differential Calculus $\left.\begin{array}{c}\\\\\end{array}\right\}$ In some universities, these two

Calc II $\longrightarrow$ Integral Calculus $\left.\begin{array}{c}\\\\\end{array}\right\}$ topics combined is called Calc I.

We will focus on Integral. Integration is a "reverse" process of differentiation. Integration and differentiation are two hands that allow us to do many computations on functions and graphs.

Review of Calc I: see Worksheet O.
