Midterm I: Some problems for review

You will be provided the following formula on the exam:

$$\kappa = \frac{|r' \times r''|}{|r'|^3}, \quad \tau = \frac{(r' \times r'') \cdot r'''}{|r' \times r''|^2}, \quad N = \frac{T'}{|T'|}, \quad B = T \times N,$$

$$a_T = V', \quad a_N = \kappa V^2, \quad V = |r'|.$$

For Problems 1-17, determine whether the statement is true or false. If it is true, explain why. If it is false, explain why or give an example that disproves the statement.
