Q: Please comment about ways to improve instruction.

1 "Tuan is a very gifted lecturer. I had him for MTH 341 and knowing that he was going to teach this course was one of the main reasons why I decided to take it. The homework assignments at the beginning of the year felt unnecessarily large, but Tuan sent out a class poll for feedback around the middle of the term and reduced the size of the assignments to make them much more fair. Overall, it feels like he really cares for the students and does a great job of explaining enough in class to where we can go build on our learning in the homework. This term was another great experience with Tuan." -- Jason Tai

2 "Office hours were not very flexible for those of us who work and attend school at 15 credits a term. Homework load is a little unreasonable since sometimes what is on the assignment isn't covered until the day before it is due. Besides that this course was excellent and I feel that I have learned a lot about complex variables." -- Andrew Shonk

3 Really wonderful course. Thank you so much for such a wonderful term

4 "At times, the homework load was a bit too high. This improved over time, however." -- John Musgrove

5 "Homework was a bit long, but otherwise the content was very well taught" -- Justin Sheetz

6 "Tuan was excellent in this class just as he was in MTH341 when I took it with him. I really have no comments to improve teaching." -- Wyatt Whiting
